- Influencer for Hero Trainer
- Paid opportunity

Instructions:

1. Choose a character you would like to represent
2. Record a video of yourself when recording the audio of the voiceline (your mouth movements/expressions will be used as a reference for the animation as well). Please look directly at the camera.
3. Please make sure there is no additional noise from the background when recording.
4. Share the video on instagram or twitter and tag us @herotrainerapp, or send an email with a link to your video to archon@herotrainer.io

Criteria:

- Similarity to character's personality and voice
- Quality (i.e little to no background noise)
- We will also take into account whether the submission was sent from a member of a marginalized community (for applicable characters).
 - Example: Emylia is a person with deafness. While many people outside the deaf community may know sign language, we will place greater weight on submissions from people within the specific marginalized community.

Remaining Characters Picked on Rolling Basis:

- Emylia (ASL)
- Jin (voiceline)

Note:

- **Bold** phrases in the voiceline section of the character are parts of the sentence that should be emphasized when talking.
- **Arzic** is not shown below because Yash Jain @foundinghero will be voicing this character.
