(template for original article - page 1)

TITLE (ALL CAPITAL LETTER, MAX. 14 WORDS, FONT SIZE 12 PT)

First author¹, Second author², Third author³, etc.

¹First author affiliation ²Second author affiliation ³Third author affiliation etc.

Correspondence: e-mail of corresponding author

ABSTRACT

Abstract should consist of **background**, **objective**, **method**, **results**, **conclusion**. Authors must use **Bookman Old style** font size **11 pt** with **justify** alignment. Maximum word count is **250**.

Keywords: All keywords must be listed on **Medical Subject Headings (MeSH** ®, https://meshb.nlm.nih.gov/). The number of keywords range from three to five words.

Note: Original article must fulfill the recommended publication components according to each research methodology. We recommend to check the specific guidance on Equator network https://www.equator-network.org/. For example:

- 1. CONSORT statement for randomised trials
- 2. STROBE statement for observational studies
- 3. COREQ statement for qualitative research
- 4. ARRIVE statement for animal pre-clinical studies
- 5. And so on.

(template for original article - page 2)

INTRODUCTION

[Introduction should contain <u>rationale</u> <u>of studies</u>, <u>originality</u>, and <u>the objective</u> <u>of the research/case report</u>. Word count ranges from 300 to 500 words.]

METHODS

[Methods section should contain study design, sampling and sample size, data collection, data analysis, ethical clearance/approval, details on intervention (if any), and other important information. Word count ranges from 500 to 1000 words.]

RESULTS

[Result section should contain baseline information of study participants,

descriptive summaries or graphical summaries, and results of hypothesis test or other statistical analyses. Word count ranges from 1000 to 1500 words.]

[Results of qualitative study may include participant quotes using double-apostrophe.]

Example:

"... I like to ride a bicycle." (Participant 1)

DISCUSSION

[Discussion section should contain limitation of studies, comprehensive discussion according to each discipline. Discussion section must be the main part and have word count more than introduction, methods, and results section (ranges from 1000 to 2000 words).]

CONCLUSION

[Conclusion should contain simple summary of results and discussion. If possible, the author could add recommendation or implication for practice or policy.]

ACKNOWLEDGEMENT

CONFLICT OF INTEREST AND FUNDING RESOURCES

REFERENCES

[Author must use Vancouver referencing style, numbered according to the order in articles with small numbers at the end of the sentence, with some examples below. Author must include only reference no older than 10 years before publication, with minimum 10 references and maximum 25 references. We recommend authors to use using Mendeley software https://www.mendeley.com/download-desktop-new/.]

(template for case report - page 1)

TITLE (ALL CAPITAL LETTER, MAX. 14 WORDS, FONT SIZE 12 PT, please use a clinical and straight forward title that mentions the diagnosis, must include: "A case report")

First author¹, Second author², Third author³, etc.

¹First author affiliation ²Second author affiliation ³Third author affiliation etc.

Correspondence: e-mail of corresponding author

ABSTRACT

Abstract should consist of **background**, **objective**, **case description** (main symptoms, diagnosis, and treatment), and **conclusion**. Authors must use **Bookman Old style** font size **11 pt**. Minimum word count is **200**, maximum word count is **250**.

Keywords: All keywords must be listed on **Medical Subject Headings (MeSH** ®, https://meshb.nlm.nih.gov/). The number of keywords range from three to five words.

Note: Original article must fulfill the recommended publication components according to each research methodology. We recommend to check the specific guidance case report publication (CARE) on Equator network https://www.equator-network.org/.

(template for case report - page 2)

INTRODUCTION

[Is this a prevalent health problem? Author must provide a brief summary of case distinctiveness with some supporting references. We suggest to make short paragraph of 100 to 150 words.]

CASE DESCRIPTION

We suggest author to use Table or Figure describing the timeline of patient's care instead of narrative explanation. Word count ranges between 350 to 500 words.

Patient Information

[Patient information, including medical history with main complaints, family history, psychosocial history, and past

medical history. How the information influenced your decisions]

Clinical Findings

[Summary of clinical findings from physical examination and how they influenced your decisions]

Diagnostic Assessment

[Diagnostic assessment, including methods, challenges, results, working or final diagnosis, and prognosis.]

Therapeutic Intervention

[Therapeutic intervention, including type (pharmacological or non-pharmacological), administration (route, dosage, etc.), and changes in intervention]

Follow-Up And Outcomes

[Follow-up and outcomes, including qualitative and quantitative methods.]

DISCUSSION

[Author must include strength and limitation of clinical approach in the case, discussion on relevant literature, and lesson learned from this case report. Word count ranges between 300 to 500 words]

CONCLUSION

[Conclusion should contain simple summary of results and discussion. If possible, the author could add recommendation or implication for practice or policy.]

ACKNOWLEDGEMENT

[Author must explain other co-authors role in this case report and write down the ethical declaration from the institution or that the manuscript has been reviewed by the institution ethical committee.]

CONFLICT OF INTEREST AND FUNDING RESOURCES

REFERENCES

[Author must use Vancouver referencing style, numbered according to the order in articles with small numbers at the end of the sentence, with some examples below. Author must include only reference no older than 10 years before publication, with minimum 10 references and maximum 25 references. We recommend authors to use using Mendeley software https://www.mendeley.com/download-desktop-new/.]

SPECIFIC GUIDE

1. Latin names

Latin names of any species should be written in italics, genus name started with uppercase, and species name starter with lowercase, variant name started with *var*.

2. Table format

Example

Table 1. Baseline characteristic of betahistine effect on peripheral vertigo patients in Duta Hospital in 2018 (n = 18)

Variable	Value
Sex Male (number [%]) Female (number [%])	6 (33 %) 12 (67%)
Age (years) mean ± standard deviation)	55.85 ± 13.71

3. Figure format

Example of diagram/graph/maps

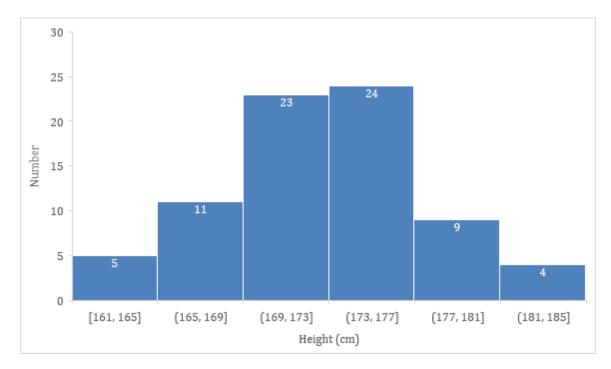

Figure 1. Histogram of students height at SMA Duta Karya in 2020 (n = 76)

Example of picture

Picture 1. Normal lumbar spine with MRI 3T
