

The Powers that Be

The powers that be want to control the world of alchemy all across the universe. They do so by restricting the physical laws of the universe.

Hierarchy

Ruler

They run the powers that be.

Manager

Manages large sectors of the galaxy called districts

Middleman

Used by Managers to initiate an attack or inspection and also to defend

Knight

Grunts who have been given special honors

Grunt

Everyone else in the Powers that be. They do menial tasks such as

Atairm ???

Atairm is a manager, he runs the scutum-Centaurus arm

AP: Solar System

Innovations

- Protection (Atairm is protected against common and uncommon forms of reality warping through his own desire to win which pierces through reality (physical, pseudophysical and paraphysical) by exploiting all of its flaws. Note that the protection is an active process of finding flaws in reality and beating them with the will to win)
- Hopeless Journey (due to his own desperation Atairm activates a spiritual journey against a superior foe to him and the enemy and he adapts to that foe in a short period of time. The effects on him are catastrophic but it does give him extreme resistance to all of the enemy's attacks)

Shanzerikum

Age: 476 million years old

Shanzeri is a masked geological who was used by the Powers that Be to survey worlds with potential. He never like his job due to

He was forced to betray his own worlds.

Kazenre

Age

Kazenre is a geological who desires self-empowerment at the costs of others. Despite not being a middleman of the powers that be, he has abilities comparable to them.
He's an ally of The Powers that Be and he pretends to be a normal geological.

Spirit

Experiment Dimension

- Kazenre calls an experiment dimension to reality.
- In the experiment dimension, Kazenre projects large alchemy tools from his spirit.
- He can use the experiment dimension to

Aktirus

Aktirus is one of the middlemen in The Powers that be. Aktirus has multiple forms which she can physically take.

Spirit

Spilitis Divinae

- When faced with attacks beyond her league, Aktirus splits off a portion of her soul to the area the attack affects.

Rovirus

Rovirus is another middleman. He is in charge of how the galaxy torques.

As of now he has been slowed down to only move once per billion years.

Attack Potency: High Star Level

Speed: 98% the speed of light

Newtonian laws defiance

He can defy all three laws of newtonian motion. This allows him to propell himself quickly and to also stand his ground when he gets hit by large attacks.

Counterforce

Rovirus can completely block off any magic up to 1 am (scale of protons and neutrons) allowing him to completely circumvent low level chikai.

Spirit

Isotope Excursion

Soulus/Spiritus

Spirit Phase

Infinite Soul

- Rovirus's Soul is extremely deep and can outpour extreme amounts of information or absorb information. The information causes isotope excursions

Riverikal Torque

- Rovirus affects the entire galaxy by doing a one time torque update which automatically fixes reality to a different state. After the fixing, consequences of being in an unstable state unsuitable for a uniformly more restrictive universe than ours would have negative effects akin to

Reverse Riverikal Torque

- He affects the entire galaxy again causing it to update in the opposite direction in time. The effect is a moderate restriction that lasts for 1,000 years in the past which is enough for it to

Jashin Kalzorak

Jashin is a middleman of the powers that be. Jashin is a mage who extensively plans and manipulates to get what he wants. He uses his magic to

Magic

Jashin is a high level mage that can use the six approaches of magic.

Geixarun

Geixarun is a geological who assimilated others into his own flesh. This

Formations

Gaseherienajus

A giant eldritch contraption without any logical rhyme or reason on it.

When one stares into it, it begins to warp atoms in space into tiny geologicals. These geologicals then desire to develop life on Gaseherienajus.

Spirit

Vow of Soulus

- Geixarun makes a Vow to hyperdiscipline itself for defensive spiritual power.

Vow of Spiritus

- Geixarun makes a Vow to hyperdiscipline itself for offensive spiritual power.

Mental Trap

- Combines all vows to trap someone's body into their own mind.

Abzolieka

Abzolieka is a geological/devil/corrupted/demon/daemon/spawn etc

She is a middleman of the powers that be

Death force

Double Exponential

Lifeforce
Double Exponential

Spiritual Stagnatos

Demon Abilities

Daemon abilities
Mind Enslavement

Kin Zyedovius

High ranking middleman of the powers that be.

He was born on planet Zyedovius and was trained by Jiyna Zyedovius. Jiyna would often punish geologicals for messing up by striking them where it would always hurt. She would also summon a monster to chase young geologicals. She said that they had to be perfect due to her "theory".

Kin Zyedovius was done with her when he was 65 million years old. Kin was able to beat Jiyna

Kin is always on guard for strikes and is able to keep his composure due to

Attack Potency: Large star level

Speed: 99.9999+% the speed of light

Counterforce

Counterforce Basics

Kinetic summon

- He summons a single instance of a kinetic attack which is unenhanced by spirit. This is pure kinetic energy he uses.

Kinetic Spam

- Upon using Kinetic summon he auto reacts to it to get another one and another one and so on until it reached infinity then he let's go at some point to do something else.
- This is used to stun and crush his opponents.

Kinetic Energy Defiance

- He is capable of defying the laws of kinetic energy. This does take a lot of physical effort especially for complex processes.

Spirit

Soulus

- Kin is specialized in Soulus adaptation.
- Soulus Akarma: a new soulus

Innovations

Autoreact

- Upgraded version of autododge
- Needs a way in euclidean geometry to function.

Kinetic Destruction

- He destroys your built up kinetic energy making you stop instantly. This makes your attacks pathetic.

Inzergu Zyedovius

AP: Small Star level

Innovations

Dissipate Power

- She can dissipate power from

Phironi Zyedovius

Counterforce

Spring force absorber

Phironi is capable of absorbing forces and acting as a medium.

Innovations

- Soul Endurance

Emzozya

This the powers that be middleman is one of the most powerful ones

Mistakes of Ruin

- She can transform small spiritual imperfections into huge ruins which destroy the enemy from within

Spirit Destructor

- makes damage permanent, does so by
-

Gavarna Zyedovius

Gavarna is a middleman of the powers that be. She is able to
Gavarna is

Telepathic gravity warp

- Gavarna has the power to warp space through the enhancement or weakening of the gravitational force. She can also use this

Kizalgus

The ruler of the Powers that Be. He is a charismatic and enigmatic figure that revels in victory. He is a visceral person on the inside but on the outside he is soft and easy-going. He lusts

She is secretive and lusts for power. The way she lusts for power is that she loves controlling knowledge. She protects and destroys the weak through various methods.

Magic

Spirit

Innovations

???

- Her soul is engraved with glyphs. They increase

Mode change

Uses the

- Balance: default mode
- Strength: trades magic power for insane strength that multiplies by 2 for each contact.
- Speed: trades physical body for insane speed which allows for casual time travel.
- Defence: trades formations for rare armor which protects herself from physics breaking attacks. From non-reality warping attacks the armor is twice as durable as the user.

- Can mode change others but this depends on their own capabilities so if you are a normal human it wouldn't make a difference.

Uro Felral

A sexual psychopath who loves dread and torture. Part of The Powers That Be and Goretech.

She lusts for destruction

She has a mechanical demonic formation that
