

Summary of Graduation Requirement Changes For Class of 2030

- ***Mathematics:*** The graduation requirement increases from three years to four years, though one year of this coursework may be completed through one full-year or two half-year Computer Science courses.
- ***Fine and Performing Arts:*** The requirement increases from one semester to two semesters.
- ***World Languages:*** A new two-year graduation requirement was established to align with college expectations and develop communication skills that are increasingly important beyond high school.
- ***Digital Literacy and Exploring Computer Science:*** In the past, students were required to complete one of these courses. This requirement is no longer in place, though both remain available as electives. Many of the skills taught in these courses are now embedded across multiple subject areas.
