

Samantha Kneebone

August 2023 \$2,500 sponsored by McNaughton-McKay Electric Company

Samantha “Sam” Kneebone is a junior at Kettering University, Flint, Michigan studying Industrial Engineering. Having grown up on a vegetable farm, in the automotive hub of southeastern Michigan, Sam gained first-hand experience about the importance of sustainable farming. She chose a degree in industrial engineering because it is defined as improving efficiency and reducing waste, which pairs well with her passion for sustainability. Sam’s goal is to be part of the GREEN solution, to reduce and mitigate waste in the automotive industry.

Sam is an industrial engineering intern at Dow Chemical in Midland, and previously interned with Livonia Tool & Laser, in Litchfield, MI as an Industrial Engineering Co-op, and at Vlastic Pickles, Imlay City, as a quality assurance technician. Her leadership experiences include Sisterhood Chairman at her sorority, DevilBots FIRST Robotics Captain of four years, and Vice President of the Sanilac County FFA Chapter (Future Farmers of America). Her hometown is Yale, Michigan.
