

EDOL 533
Technology Exploration Assignment Form

Student Name: **Laura Whitleigh Harp**

Date: **05.27.2013**

Technology Exploration Resource Explored (be sure to differentiate which resource is which for each of the three items:

1.	Describe what you learned from exploring this resource. Be thorough in your response.
	Storybird is an amazing program that is probably one of the most fun that I have researched during this class. Storybird allows users to use already stocked art to create stories. The examples on the website are truly beautiful! This is a great way to get students engaged and incorporate technology.
2.	How could you use this resource in a school setting? It does not matter if it is in your field or level, you need to understand how the resource might be used in educational settings.
	In a classroom, Storybird would be an absolutely wonderful addition. It is a program that could instantly increase students engagement. It incorporates technology and allows students to create stories with pre-loaded art that is wonderfully appealing to the eye. This could help students become more engaged in writing stories, as well as reading them.
3.	Would you recommend this resource to other educators? Like/Dislike; Ease of use, fee or not, and so forth. Why or Why not?
	I would definitely recommend this resource to other educators. I cannot stress enough how beautiful the graphics are and how much I believe that students would love using it. The best part of this program is that it seems to be totally free! That always makes things better! It seems very easy to use as well, even for students to use. It is a win-win!
