⚡ **Tools and Resources** *(click the link and prepare your browser for work)*

- ★ 👉**MonetizedProfiles** (monetizable accounts) (5% discount with code SAIDOX)
- ★ 👉**ChatGPT** / **Microsoft Copilot** (free) prompt generation
- ★ 👉**Leonardo AI** (free) image generation
- ★ 👉**Hailuo AI** (free) image to video
- ★ 👉 **DupDup** (free) sound effects
- ★ 👉**Capcut** (100% free) for editing
- ★ 👉**Pixabay** (free) music
- ★ 👉**Payhip** (free) to sell your guide

Step 1: Get a Pre-Monetized Account ***(optional BUT powerful)***

- ❖ If you wanna get legit TikTok/YouTube accounts that already meet all the requirements.

- ☐ Go to **Monetizedprofiles**
- ☐ Go to "*Monetized YouTube Accounts*" (*or TikTok if you want*).
- ☐ Select an account that meets your budget.
- ☐ Enter your email to receive login details.
- ☐ Start posting after 4-10 days.

Step 2: Write the Image Prompt

1. **Use ChatGPT** / **Microsoft Copilot** to generate detailed image prompts.

- [ ] Example Prompt: (you can change what is highlighted to your liking)

  "Give me a list of prompts for generating surreal images that feature a group of grotesque, surreal creatures walking through a foggy, urban street, their heads are replaced with bizarre forms such as (for example, animal skulls, twisted branches, glowing orbs, or mechanical constructs). Their bodies should be a combination of (for example, human, animal, and vegetable) features, with exaggerated and distorted physiques. The fog-shrouded cityscape features tall, shadowy buildings with faint neon signage, creating an eerie and mysterious atmosphere. The figures should be multi-headed or with abstract, non-human facial features, move together in an otherworldly parade, their unsettling presence enhanced by the dystopian urban environment."

- [ ] Copy the generated prompt for use in the next step.

Step 3: Generate the Images

1. Use **Leonardo AI** (it's FREE)
   - [ ] Go to **Leonardo AI** and sign up (takes 2 minutes).
   - [ ] Adjust settings:
     - Model: **Leonardo Phoenix**
     - Mode: **Flow State**
     - Aspect Ratio: **9x16** (for YouTube/TikTok/Instagram Shorts).
   - [ ] Paste the Copilot-generated prompt into Leonardo AI and click **Generate**.
   - [ ] Download the images you like. If unsatisfied, tweak the prompts and regenerate again.

Step 4: Upscale the Images (optional)

1. Use **CapCut Upscaler** (free).
   - [ ] Sign up with your Google account
   - [ ] Go to Image Studio
   - [ ] Scroll down
   - [ ] Click on Upscale Image
   - [ ] Upload the generated images
   - [ ] Click **Upscale** and download the enhanced images.

Step 5: Animate the Images into Videos

1. Use **Hailuo AI** (free trial available).
    - [ ] Go to Hailuo AI and sign in with Google.
    - [ ] Choose **Image to Video**.
    - [ ] Upload the upscaled image.
    - [ ] Paste the movement prompt:
        - Example: *"Walking slowly"*
    - [ ] Click **Create**.
    - [ ] Repeat for all images
    - [ ] When your videos are ready, download them all.

Step 6: Edit the Videos

1. Use **CapCut** (100% free)
    - [ ] Import all the animated videos into CapCut/Pippit.
    - [ ] Drag the videos into the timeline.
    - [ ] Add transitions:
        - [ ] Click the **Transitions** button and choose a smooth transition (e.g., fade out/in).
        - [ ] Use **Apply to All** to save time.
        - [ ] Apply the **"Play Pendulum"** effect:
            - [ ] *Setting : Strength: 23 | Speed: 20 | Twist: 0.*

Step 7: Add Sound Effects

- [ ] Add **effects** to make it feel more cinematic.

2. Use **DupDup** OR get **My Sound Effects Pack**.
    - [ ] After you sign up, select the **Sound Effects** feature.
    - [ ] Use ChatGPT to generate sound effect prompts:
        - Example: "Give me a detailed prompt to generate soundscapes that match the mood and aesthetic of each scene."
    - [ ] Paste the prompt into and customize it:
        - Duration: **5-8 seconds**
        - Stability: **Max**

- [ ] Generate and download the sound effects.
- [ ] Import the sound effects into CapCut and sync them with the corresponding video clips.

Step 8: Export

1. **Review the Video**:
   - [ ] Ensure transitions, sound effects, and visuals are synced perfectly.
2. **Export**:
   - [ ] Export the edited video at **1080p, 60fps**.

Step 9: Monetize Your Videos

➢ **Ad Revenue (the obvious one)**

- Once you hit 1,000 subscribers and 10 million Shorts views in 90 days, you can join the YouTube Partner Program.
- If your videos start going viral, you're looking at $5K to $10K a month, easy.

➢ **Sell Digital Products or Presets**

- [ ] Create a **PDF guide** (use **Google Docs**) with your steps/tools.
- [ ] Design a cover in **Canva** (search "digital product" templates).
- [ ] Sell it on **Payhip** (free, no subscription):
  - Set a price (e.g., $10-30).
  - Add the link to your social media bios (YouTube/TikTok/Instagram)

- **Promote**: Add a CTA like *"Learn how to make these videos! Link in bio."*

***Pro Tip**: Test different prompts/variations to keep your content unique!*
