

Luciano Oliva Bianco

Date of birth: 22/09/1992

Email: lucianoolivabianco@gmail.com

LinkedIn: <https://www.linkedin.com/in/lulox/>

Portfolio: <https://lulox.dev>

Technologies

Frontend: Typescript, React, Next.js, TailwindCSS, Wagmi, Viem

Smart Contracts: Solidity, Foundry, Hardhat, Chainlink, Scaffold-ETH 2

Backend: Node.js, Express, PostgreSQL, Supabase, Docker, Linux

AI: n8n, Eliza

Experience

Independent Developer

06/2024 - Present

I'm enhancing my technical skills, studying n8n automation with AI, Solidity security, and modern development practices, with the aim of launching a blockchain and AI-based product to align with emerging trends and participating in hackathons with innovative projects.

Full-stack Web3 Developer at BuidlGuidl

04/2023 - 06/2024

Developed several web3 app prototypes as part of my learning journey along this builders DAO, using Scaffold-ETH 2 (Solidity, Foundry, Hardhat, Typescript, React, Next.js, TailwindCSS, Wagmi, Viem) as a starting template.

FEDUN (University teachers union) — Community Manager

April 2015 - February 2020

- Web: LAMP server setup for Moodle and WordPress. Layout design in WordPress using Elementor, with ongoing performance and SEO optimization. UX/UI optimization based on data from Google Analytics.
- Social media: Creation and scheduling of content for Facebook, Twitter, Instagram, and YouTube, using Adobe Photoshop, Adobe Premiere, Canva, and other online tools.
- Teamwork: Trainer in new technologies. Team coordination (Trello).

Hackathons

- Built **SAMI**, a group chat game where users can bet on who's the AI impostor, and won runner up place in **Mantle Hackathon 2025**.
<https://github.com/fabian416/sami>
- Built **PunkSociety**, a social dApp with NFT posting and monetized interactions that runs on its own Avalanche L1, and won third place in **Avalanche Summit Hackathon 2024**.
<https://punksociety.xyz/> — <https://github.com/luloxi/PunkSociety>
- Built **Sportsbook**, a sports dapp where two teams can bet and a referee sets the result and distributes the prize, and won the first place in **Think and Dev Hackathon 2022**.
<https://github.com/luloxi/Sportsbook>

Education

Online Education (2022 - Present)

- **freeCodeCamp**: Specialized in full stack development, including React, TypeScript, Next.js, Node.js, and TailwindCSS, with practical experience in developing web apps.
- **Speedrun Ethereum**: Learned Ethereum dApp programming with Scaffold-ETH 2, Solidity, RainbowKit, Viem and Wagmi for web and blockchain interactions.
- **Blockchain Security Academy**: Graduated with an 87/100. Learned to detect, exploit, and secure against various blockchain vulnerabilities using Hardhat, with hands-on exercises.
- **Cyfrin Updraft**: Learned advanced Foundry usage, smart contracts security, core blockchain concepts, and cryptography principles.
