

IT'S A CATAPULT

This is a medieval siege machine, or "trebuchet".

The winery uses it as a catapult for watermelons in a once a year contest. Greg Trott, the founder of the winery facetiously suggested that it could be used for bombing neighbouring wineries with bottles of fine wine. He hoped they would return the favour and make it a showpiece for his beloved McLaren Vale.

Wirra Wirra honoured Greg's pioneering spirit by hurling a splash of Viognier into our highly revered Shiraz and calling it [Catapult Shiraz](#).
