

ENVIRONMENTS & NETWORKS urban mapping WORKSHOPS

so I how about

1. Let's walk through the nearby park, let's cross the busy street, let's enter the university campus and look around.
2. Let's sit in the classroom and talk about what we have noticed. Here we would like to invite our participants to elaborate on how each of them perceives and tends to understand the places we have just walked through.
3. Next, let's ask how you would start researching a place, in what way would you do it, is it in terms of aesthetics or communication?
4. Here we would like to ask you to share ideas, concepts, readings applicable to alternative mapping and documentation of complex natural cultures, environments and networks.
5. We will use the recommendations from the workshop to build the students' environmental/network studies projects.
