

Privacy Policy — WiFi Analyzer

Last updated: June 30, 2026

This Privacy Policy explains how the WiFi Analyzer app ("the App", "we", "us") handles information. The App is developed and operated by Sahan Kara ("the Developer"). By using the App you agree to this policy.

Summary

WiFi Analyzer is built to be private. It has no user accounts and no login. We do not sell your data and we do not show ads. Your test history is stored only on your device. The App does not collect personal information that identifies you.

Information the App uses

- *On-device data.* Your speed test results and history are saved locally on your device. They stay on your device and are not uploaded to us. You can delete them anytime in Settings.
- *Network measurements.* To measure speed and latency, the App exchanges test traffic with public measurement endpoints provided by Cloudflare (speed.cloudflare.com) and connects to well-known public hosts for ping tests. These use your IP address as any normal internet request does.
- *Public IP and provider lookup.* To show your public IP, internet provider, and approximate city/country, the App may send a request to a public IP information service (ipapi.co). This describes your connection, not your identity, and is not stored on a server.
- *Wi-Fi network details (optional).* If you use the Wi-Fi Security feature, the App reads the name (SSID) and security status of the Wi-Fi network you are currently connected to. iOS requires location permission for this. Your location is used only on your device for this purpose and is never stored, logged, or shared. iOS does not allow apps to list nearby networks.
- *Device and system information.* The Device & System tool reads standard on-device hardware information (model, OS, CPU usage, memory, storage, battery). It is displayed on screen only and is not collected or transmitted.
- *Subscriptions and analytics.* Purchases are processed by Apple through the App Store. We do not receive or store your payment details. To understand how our subscription offers perform, we use Adapty, a subscription analytics provider, which receives anonymized purchase and event data tied to an app-generated identifier, not data that identifies you personally.

What we do NOT do

We do not require an account or collect your name, email, or contacts. We do not track you across other apps or websites. We do not sell or rent any data. We do not show third-party advertising.

Third-party services

Apple (App Store, in-app purchases, on-device frameworks); Cloudflare (speed endpoints); ipapi.co (public IP lookup); Adapty (subscription analytics). Their handling of data is governed by their own policies.

Data retention and deletion

Test history stays on your device until you delete it (Settings, Clear History) or remove the App. Removing the App deletes all locally stored data.

Children

The App is not directed to children under 13 and does not knowingly collect personal information from them.

Changes

We may update this policy from time to time; material changes will be reflected by updating the date above.
