

Principal Quality Standard II, Elements C & D

[EDL 500 Module 6 Critical Thinking](#) and [EDL Strategies Professional Development](#)

In this Critical Thinking paper, I developed a multi-tiered levels of support for my professional development plan. Module 6 Critical Thinking demonstrates proficiency of the Quality Standard II, Element C in that the professional development opportunities will create an inclusive environment where the academic needs of MLs will be prioritized. The development of the ELD Strategies professional development, as well as the reflection work done in Module 6 Critical Thinking addresses Quality Standard II, Element D by working toward student achievement for MLs by providing instructional resources, and inspiring professional capacity to support the academic achievement of MLs at FCHS.
