

Groups...on chart paper graph pairs of equations on the same coordinate plane. (One per group)

1. $y = 2x+3$ and $y = -1/2x-5$
2. $x = -4$ and $y=2$
3. $y=2x+1$ and $y=2x-6$
4. $2y=6x+4$ and $y=3x+2$
5. $y=1/2x$ and $y=x+2$
6. $y=6x+6$ and $y=3x+6$
7. $y=3x+1$ and $y=x-3$
8. $y=x-5$ and $y = -3/4x+2$

**Use two different colors and write the equations on the chart.

Have groups tape charts on the wall and have the students do a gallery walk and discuss each pair of graphs.
