Abstract

The abstract should concisely summarize the objectives, methodology, main results, and conclusions of the study. It should contain between 150 and 250 words, written in a single paragraph, without citations or undefined abbreviations.

Keywords

Keyword 1; Keyword 2; Keyword 3; Keyword 4; Keyword 5.

1. Introduction

Present the general context of the study, its scientific relevance, and the main objectives. Avoid extensive literature reviews; focus on the justification and contribution of the research within the field of Nanosciences, Nanotechnology, and Natural Sciences.

2. Materials and Methods

Provide a detailed description of all procedures, materials, equipment, and methods used, allowing the experiment to be reproduced by other researchers. Indicate reference standards or methodologies when applicable.

3. Results and Discussion

Present the results clearly, using tables and figures numbered sequentially (e.g., Table 1, Figure 1), with comprehensive captions. Discuss the results in comparison with previous studies, highlighting contributions and limitations.

4. Conclusion

Summarize the main findings of the study, emphasizing their relevance and practical or theoretical implications. Avoid repeating information already mentioned in the Results and Discussion section.

Acknowledgments

(if applicable) Include acknowledgments to funding agencies, scholarships, or technical support.

References

References must follow the ABNT NBR 6023:2018 standard or the style adopted by the journal.
