

Week 2 Update Assignment

Due: Wednesday at 3:30 PM

Your second evaluated assignment should be submitted as a PDF and emailed to reports@ici3d.org. This report should be 2 or 3 pages (written in 12-point and larger fonts) and contain the following:

- Updated description of proposed research question
- Short description of data being used (could be simulated)
- Updated outline of analysis plan
- Outline of methods
- Steps, dependencies, and who will be responsible for each component
- Description of current progress

The report should have a separate Appendix (not covered in the page limit) with a point-by-point list of the comments you received on Monday morning, and your responses. This is a useful exercise for gathering your thoughts, and also good practice for corresponding with academic journals. Your responses should be short, but you can add key details, if you have had time to address a point in an interesting way. It's fine if some of your responses are preliminary, or indirect: "We hope to get back to that later", or "We decided to do XX instead" could be fine responses to some comments.
