4th-Nightmare Lore:

- Nightmare is an amalgamation of all the other oc's, their abilities, and real irl personalities, smashed into one.

- Here are some basic descriptions of his appearance :

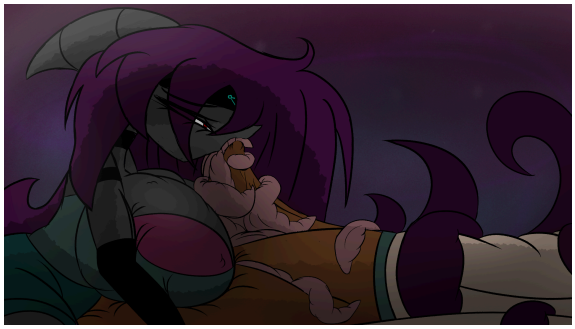

1. **Horns :** Nightmare has horns to identify himself as an incubus demon.
    - They can either be rotated to adjust, hide themselves within his hair, or break off entirely.

2. **Hair :** Nightmare has similar abilities to Pride's shadows in Fullmetal Alchemist : Brotherhood.

    - It can grow to very long lengths
    - Change texture from hair, to sharp solid, and latex rubber.
    - Mainly used for reaching, ensnaring, absorbing.
    - It can grow longer when in direct contact with any light source.
    - Grows teeth and eyes that can eat, or mimic voices that he learned.
    - Hair changes color from Gray, to Purple, to complete void-black. Grey is a neutral emotion with the texture being hair-like. Purple gives the hair a latex rubber feel with his emotion being turned on. And finally black means he is either about to attack or absorb, the texture also being rubber.

- Other examples of the hair used to ensnare prey ,

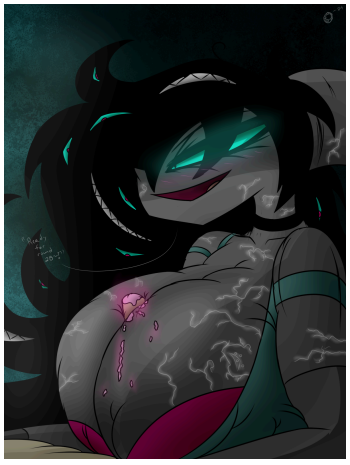

---

4. Body Transmutation :

- Nightmare has about the same ability to copy anything and anyone he can remember, and transmute himself to achieve that form. However, he can't mimic the power abilities as the original.
- He does this by either using his hair to latch on to someone, draining their stamina, or by directly absorbing their seed (cum.)

- He can give others the ability of disguise for a limited time by transferring that power to the other via kissing (making out) , sexual intercourse, milking, smothering, or by ensnaring them with his hair.

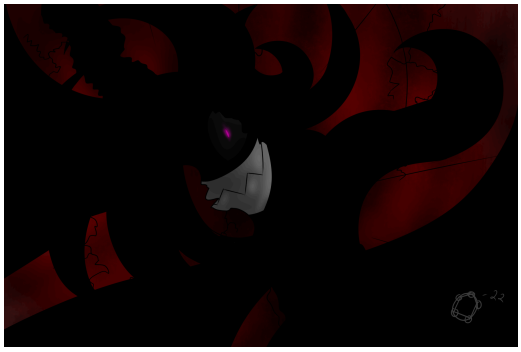

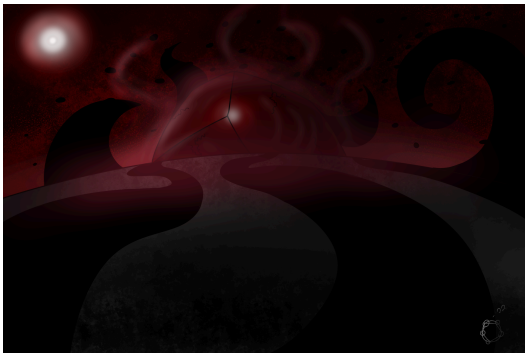

- In addition to all of this, Nightmare has the ability to transmute his genitals to either a penis, a vagina, or nothing at all. This is an ability that was implied, but will be shown in images in the future.

- He can grow into a bigger size to overwhelm or smother his prey.
- Symbols can appear around his body when excited.

- If his power goes completely out, he will revert back into his shadow form, and then back into a philosopher's stone until he can absorb power again.

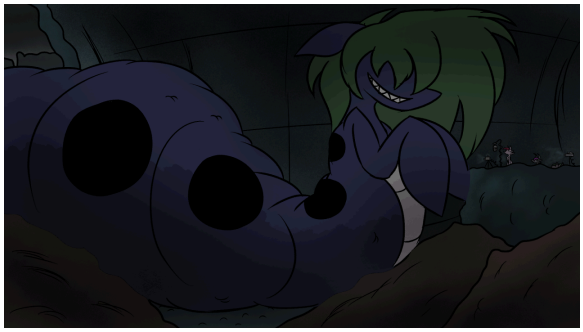

---

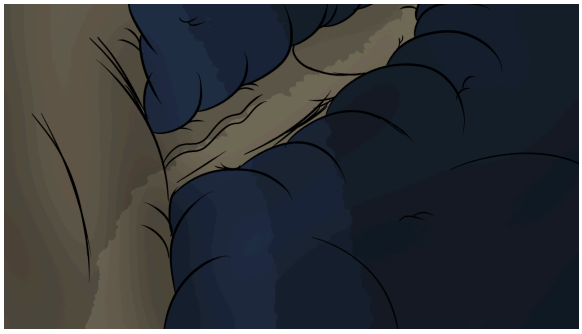

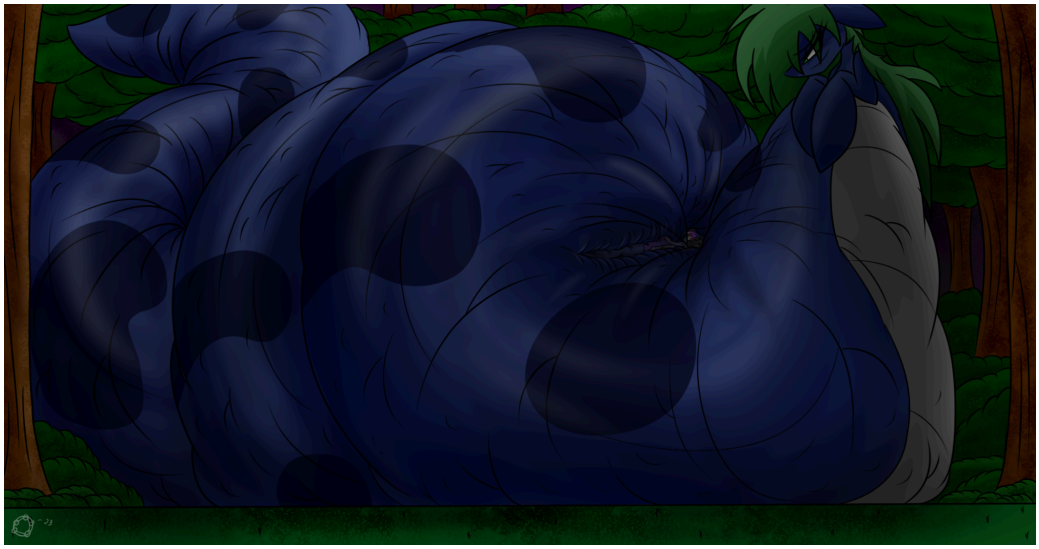

5. Other forms : Sine The Naga, Leviathan, 4th-homunculi Equine :

- While he can transform into other people & objects, too much power or distraction can dissolve his power, making him vulnerable to outside forces like a normal human.

- **Sine The Naga :** A super-sized hybrid equine naga serpent whose main purpose is to capture prey and milk them or vore them for their essence. This huge form is only able to last for a limited time.

Examples : (Below)

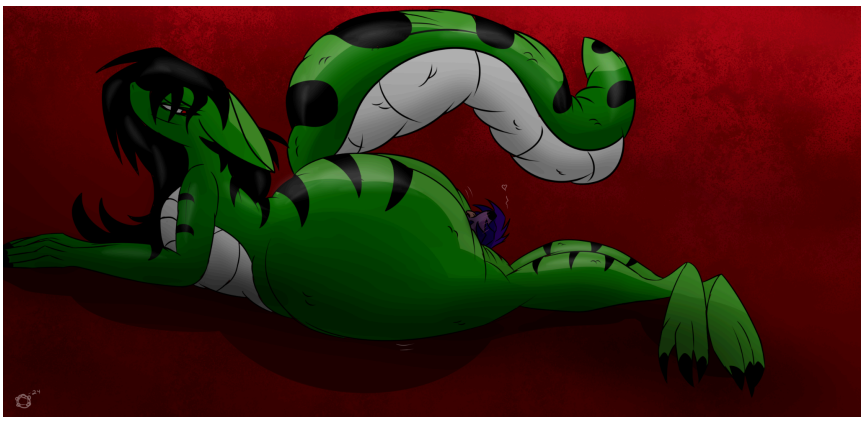

- **Sine Leviathan** : This is another giant form of Nightmare similar to the unleashed Envy form from Fullmetal Alchemist : Brotherhood. This form is used for the same reason as the others, to overwhelm, capture, and absorb .

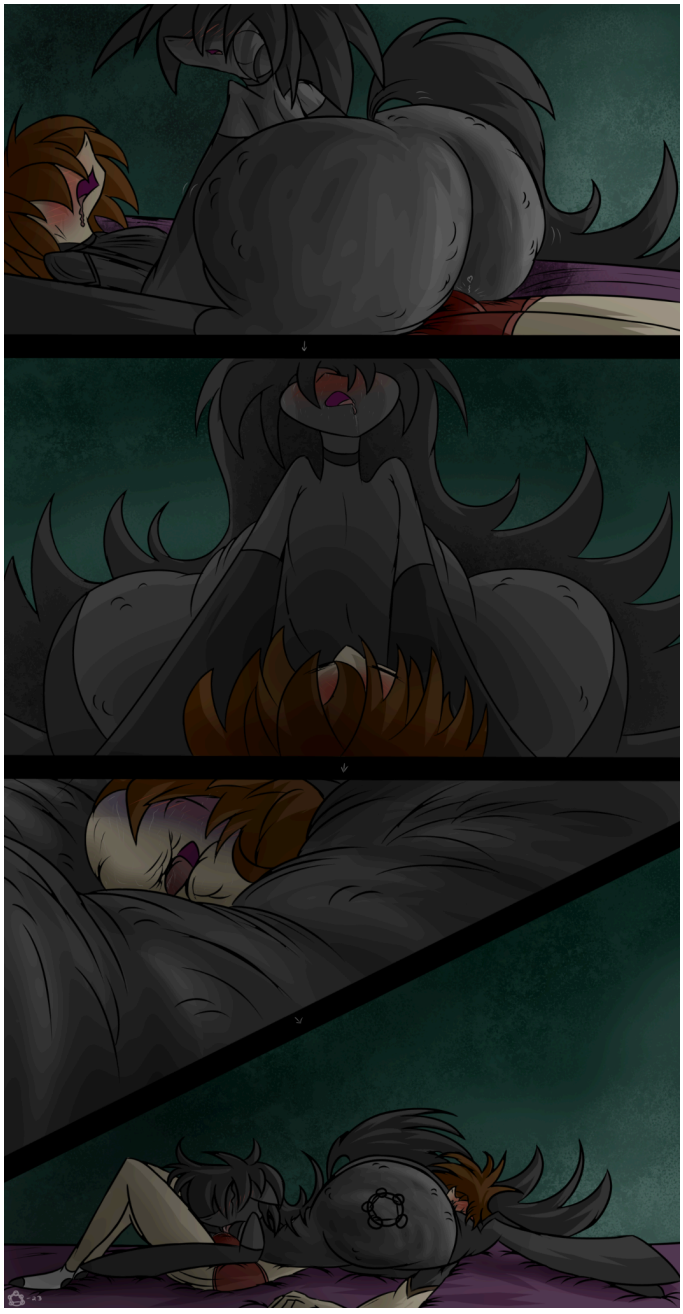

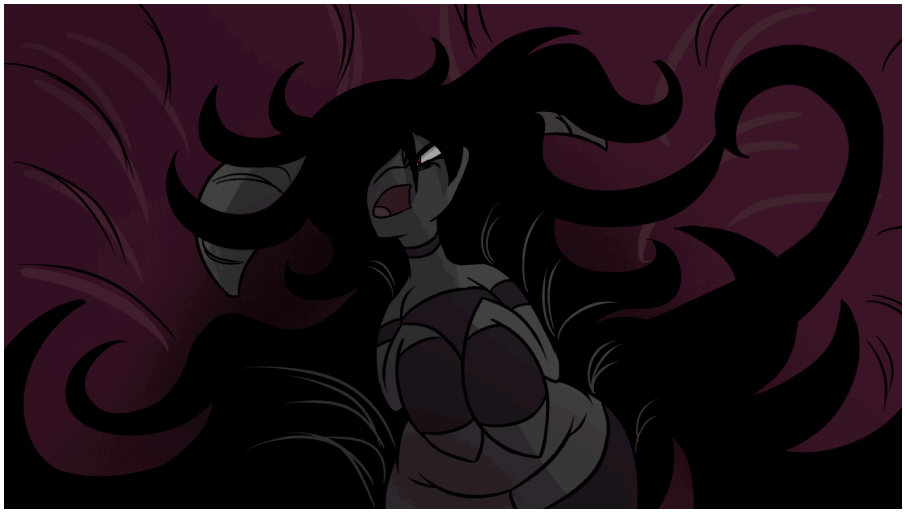

---

6. 4th-homunculi Equine Pony : Finally, Nightmare can also transmute into a large pony and has the same abilities to absorb, transform, and grow. This form is used for long travel as well.

CONTAINS
·AURORA BOREALIS
·SURPRISE BOREALIS PIE
·SINE WAVE FREQUENCY
·THE COSINE PITCHSHIFTERZ
·??NIGHTMARE??
SHAPESHIFT
- PHILOSOPHER'S STONE ALLOWS HIM TO COPY ANY ABILITY HE CAN REMEMBER.
