

## **Nevada Medical Providers Support Petition Initiative to Enshrine Abortion Rights in Nevada Constitution**

As health care professionals across Nevada, we ardently support the *Nevadans for Reproductive Freedom* petition initiative to enshrine abortion rights in the Nevada Constitution. This initiative gives our patients and all Nevadans the opportunity to protect their freedom to make private medical decisions without government interference, no matter who occupies positions of power.

Like the majority of Nevadans, medical providers agree that the government should stay out of personal, private decisions like abortion. We firmly believe that patients should be free to make their own decisions about their bodies, lives, and futures, with their trusted physicians — without political interference.

Health care professionals also know that every pregnancy is different, which is why every patient should be able to make their own decisions about what is best for their health, future fertility, and life. We've seen the harm impacting patients in other states that have banned abortion, such as Idaho and Utah.

We're grateful that Nevada has a long history of protecting abortion rights, and that in 1990, a voter referendum codified the protections for abortion outlined in *Roe v. Wade* into state law. But since *Roe v. Wade* was overturned in 2022, politicians nationwide have been ramping up their efforts to control women's personal decisions on abortion.

With threats to abortion access and reproductive freedom growing across the country, it's time to act here in Nevada. The *Nevadans for Reproductive Freedom* petition initiative will build upon and improve our state's existing state protections for abortion rights. By passing this measure, we can protect patients' rights to abortion once and for all.

Signed:
