Brief summary/ Description of source;-

A list of the key factors that a storyboard should include.

Brief summary of what I Have learned;-

From this list, I found that storyboards should have a description of what the particular shot will include. In addition, I have learned that a storyboard is meant to give its viewer the gist of how the story will translate to film. The point of a story board isn't to try to recreate the entire film , but to demonstrate important key parts that will draw the viewer in.

Reliability of the source;-

This source has enabled me to understand what my storyboard should include. It has been useful in doing so by providing me with a list of things to consider when designing my storyboard. I would consider this source reliable.

Where next?;

I aim to begin to design my storyboard.
