Hobo Slow Joe Strikes Again!

by: xXpearlmasterXx

Hobo Slow Joe, the infamous hobo who hijacked a train to either help sabotage efforts on the Easter Island vs. Kazakhstan War has struck again! This time, he has managed to capture Air Force One. He did so by painting himself orange, and wearing an awesome wig. He was mistaken as Donald Trump, and used the disguise to infiltrate the entire US government. He got into the plane, ranting until reaching the cockpit, and hijacked it using two duct-taped candy canes. The plane's location is unknown, but it will likely be scrapped and sold for a new pair of socks.

You know what kinda train this is?

Shoutout to Fred for being... Fred.

I swear it wasn't me.

What scientists think it will look like.

Laws of Physics Won't Apply in 2021

by: Billybob Joe

Over two years ago, it was reported by Yesterday News that the laws of physics would not apply in 2017. We were, in fact, wrong, but only by two years. The Aztecs believed one of the Gods would come to Earth to destroy them. Four years late, the Spanish came and absolutely destroyed the Aztecs as promised. The calendar common society follows is based on the birth date of Jesus; however, the date is inaccurate. They were four years late. According to the Aztecs, if the world did not end in 2012 (which is actually 2016), no laws of physics would apply in 2017. Four years later, in 2021, no laws of physics will apply.

Newton's Cradles, the new, revolutionary device which encases a certain area and enforces laws of physics, are now on sale in preparation of 2021! Buy today at the same places we were selling them in 2016!

Yaundastan Accused of Profiting from Kazakhstan - Easter Island War

by: xXpearlmasterXx

Late in the morning this afternoon, a train stolen by a hobo was found, revealing evidence implying that Yaundastan has been sending supplies to both Kazakhstan and Easter Island. There were various supplies, including gummy bears and Dihydrogen Monoxide-based weapon technology. The front of the train looked like a passenger train, but had secret laboratories. The rest of the train was cargo cars. The other In an interview with Yesterday News, the President Minister Emperor of Yaundastan, Phil Meup said, "Hah, yeah, I love money. You can't lose if you play both sides. Also, can you do me a solid and cut this from the published interview?"

A bridge was removed to derail the train.

Age Limit Set on Playgrounds

by: Billybob Joe

People above the age of thirteen were recently banned from local playgrounds. You may think, "Who cares?" Well, WHO (World Health Organization) cares! WHO and DIC (Diabetes International Clinics) have been teaming up to allow teenagers back on playgrounds. They claim that playgrounds both relieve stress and keep teenagers fit and healthy. Karen, a local mother, posted on Facebook, "Sketchy teenagers go to the playground to do disgusting things such as play tag and have fun! They might get injured! Why can't people just be ascended straight from hell like me and skip the useless stages of childhood?" Karen is known mainly by her campaign, "Outdoor Teens", which was a group of moms who would raid houses and destroy teenagers' phones so that they would do more productive things with their lives, such as go outside.

How to Get Rich Quick, Fast

by: Top Tips

In order to get to Level 50 Boss in life, you must start small. Riches don't come overnight. It takes at least a week. To make money, you must spend money. But where do you start? The road to riches starts with a simple fiver. It can be of any currency. In this case, I'm using Canadian dollars. Take a five dollar bill, and place it into a box. Get a friend, and tell them to put five dollars in the box. Give the box to the friend, then buy it off of him for only five dollars. Boom! Open the box, and now you have ten dollars! Your friend, on the other hand, did not make any profit. The five dollars he put in was reimbursed by your five dollars. Repeat the process every once in a while, or whenever you need money. Watch out, though. If you do this too many times, you may cause over-inflation.

Violent Crash On Highway E-69

by: Billybob Joe

A fatal pileup occurred on highway E-69 connecting Africa to Saskatchewan the other day when a surprise fork in the road was added. Dong P. P. Schlong was eating ramen noodles from a cup and discarded the foldable plastic fork through his window. The car behind him drove over the fork, popping its tire. It was then launched through the air, landing on top of Dong's car, causing the two cars to explode. Next to the highway was a series of gasoline trucks parked next to each other, causing a train of explosions, eventually exploding a flour factory, causing a mist of flour to blanket a span of three kilometers squared, causing 1200 cars to pile up. Three million people were injured, but only one unicorn was found dead.
