

A report of an Event

School Sports Day!

Last Friday, at our school, we celebrated the sports day, all the students participated in different volunteering tasks and we were all very friendly. It was absolutely fantastic!

To begin with, the atmosphere was great. All the students were doing their activities and all worked very well. There were people controlling the music system, others transporting the necessary equipment and materials to the sports field, also there was a corner with people specialized in first aid in case something happened. The day passed very quickly, we have done different types of sports activities, such as; run, jump rope, traditional games, basketball, and football. The students who participated with more desire received an award as the best athletes in the school. We all had a great time and we want next year to come to repeat it!

All in all, it was a fabulous opportunity for students to have fun, play sports and have a different day. It was a great success and I'm glad that I was there!
