**Disclaimer:** This list is designed for people with a body 3 Tav (aka “tall female”) to find compatible mods easily. It is **not** intended to belittle or judge mods that are not body 3 compatible at this time.

Please do not use this list as an excuse to attack anyone, these are all free resources.

Remember that most modders work **for free**. They deserve your respect, and you are not entitled to anything. Thank you in advance for understanding.

Hello everyone!

As someone with a body 3 Tav, it can sometimes be difficult finding mods that are compatible. But, we're in luck, as there's plenty of great mods that work beautifully and I wanted to recommend some of my favourite ones that I use on my Tav, Bella, all the time.

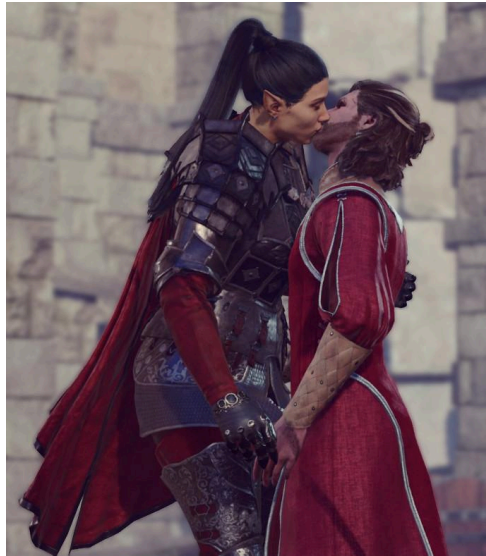

She is a paladin so many of these will be plate armour or chainmail, but I plan to have categories for each key type such as formal outfits, as well as a category for lingerie and intimates, which will include some adult material, so reader discretion is advised!

I hope this list is useful to you. Please note, these are mods I use on Bella frequently and that I fully endorse, so it's not a list of *every single* body type 3 mod out there. These are just handpicked by me based on the fact they look great and run very well in-game.

Enjoy ☺

Straddles the line between formal and casual, real nice mix in here

Hair

## HAIR

**Note:** I have tried to select **the most body 3 friendly hair mods** out of my collection.

Bella is not particularly adventurous when it comes to her hair, she usually settles for a trusty ponytail, but occasionally you may see her in some of these mods.

I use the mod [Darker Black Hair](#) on Bella to give it that raven colour. To my knowledge, this works on **all** body types.

*Bella wears "Royal braid"*

# Photo mode poses

## PHOTO MODE POSES

Below are a list of photo mode mods that work well for body 3 and that I have tested at the time of writing. As always, this isn't every mod, these are just ones I've had the chance to use so far.

I need to add in some shots using them but for now, here are the links!
