AUTHOR TAXONOMY

AUTHOR NAME: Role _____

AUTHOR NAME: Role _____

AUTHOR NAME: Role _____

The 14 roles of contributors according to the CRediT taxonomy are described below:

Taxonomic Category	Role Description
Conceptualization	Ideas; formulation or evolution of the overall research goals and objectives.
Data Curation	Management activities to annotate (produce metadata), clean data, and maintain research data (including software code when necessary to interpret the data) for initial use and later reuse.
Formal Analysis	Application of statistical, mathematical, computational, or other formal techniques to analyze or synthesize study data.
Funding Acquisition	Securing financial support for the project leading to this publication.
Investigation	Conducting research and the research process, including performing experiments or gathering data/evidence.
Methodology	Development or design of the methodology; creation of models.
Project Administration	Management responsibility and coordination for planning and executing the research activity.
Resources	Providing study materials, reagents, laboratory samples, animals, instrumentation, computational resources, or other analytical tools.
Software	Programming, software development; designing computer programs; implementation of the code and supporting algorithms; testing of existing code components.
Supervision	Responsibility for oversight and leadership in the planning and execution of research activities, including external mentoring of the core team.
Validation	Verification, whether as part of the activity or separately, of the replicability/reproducibility of results/experiments and other research outputs.
Visualization	Preparation, creation, and/or presentation of the published work, specifically the visualization/presentation of data.

Writing – Original Draft	Preparation, creation, and/or presentation of the published work, specifically the writing of the initial draft (including substantive translation).
Writing – Review & Editing	Preparation, creation, and/or presentation of the published work by the original research group members, specifically critical review, commentary, or revision – including pre- or post-publication stages.

Authors of the manuscript should only select the roles they deem relevant for each individual, and it is not required to include all 14 roles. Individual collaborators may be assigned multiple roles, and a given role can be assigned to several collaborators. When multiple people perform the same role, the level of contribution may optionally be specified as "lead," "equal," or "supporting".

Declaration of Use of Artificial Intelligence Tools in Manuscript Writing – INGENIO Journal

I, [full name], as the principal author of the manuscript entitled: [Title of the manuscript], voluntarily and transparently declare that during its preparation:

- I have used artificial intelligence tools exclusively for the following purposes (check all that apply):

- ☐ Translation of content between languages.
- ☐ Improvement of writing and style.
- ☐ Organization or structuring of ideas.
- ☐ Recommendations for textual coherence and cohesion.
- ☐ Other (please specify): _____

I declare that artificial intelligence tools were not used for the automatic generation of the main scientific content (hypothesis, results, discussion, or conclusions), ensuring that the intellectual authorship and ethical responsibility of the manuscript rest entirely with the author(s).

Likewise, I commit to complying with the principles of academic integrity established by the INGENIO Journal.

If no artificial intelligence tools were used at any stage of the writing process, I check the following option:

- ☐ I declare that I did not use any artificial intelligence tools for the preparation of the manuscript.
