

ALE April Report

Our students have had lots of growth with improvements in behavior and academics. A K-4 has had a partial transition time increase at Perritt not once but twice in the past month. Our 5-8 has had improved grades and participation in the class. The high school students have started a unit of study in their English class on informational texts centered on the Chernobyl Nuclear disaster, which has been very engaging. We are having virtually all students participate in state tests next week, many taking place on their home campus.
