

***Around the world it is likely that more adults will work from home and more children will study from home as computer technology becomes cheaper and more accessible. Do you think it is a negative or a positive development?***

- Dàn ý:

- Positive > Negative
- Body 1: Positive
  - + Save money on commuting: gasoline and spend more time with families and friends.
  - + Use as earning and learning tool: providing knowledge for users
  - + Eg: Youtubers and self-study
- Body 2: Positive
  - + No motivation: work alone, no other employees or students to share their work pressure → struggling with their job-related problems.
  - + No discipline because of flexibility time at home: sleep during the day and work through night → Health problem
  - + Eg: My neighbor works at home with her computer all day → easily get exhausted

Từ vựng chủ đề Technology :

<https://www.ielstutor.me/blog/flashcard-technology>

In this day and age, more and more contemporary attention has been placed on the phenomenon that adults and young generations have a tendency to earn their living and gain knowledge at their homes due to the decreasing of hi-tech prices and its accessibility. **This essay will include both benefits and drawbacks.**

On the one hand, there are a number of pros that people can get when they work from home. Firstly, they can save on commuting expenditures such as money for gasoline or parking. Instead of that, they have more free time to gather with their families or take care of themselves. **[1]** Another merit point is that both workers and students can use smart devices as earning and learning tools. Nowadays, smartphones or computers are made with the intention of providing knowledge to users. For example, content creators like Youtubers, can work online all day and still earn sustainable income, while students can sign up for some online classes on the Internet and gain more knowledge by self-study.

**[1] : Ý mình viết bị lan man rồi nè**

**[learning tools] → chưa giải thích learning tools nào ? cho phép học như thế nào ? giúp ích như thế nào ? hiệu quả hay không ?**

**Rồi mình đưa [content creators earn income] , rồi quay sang [students] ⇒ Nên đưa 1 nhóm đối tượng để cách viết của mình thống nhất nhé**

**[main idea] : students can do distance learning and self-learning**

**[supporting idea] : attend online class + find questions and answers through online library → boost their independence in study**

**\*Ở đây ý này mình viết hết cho students**

On the other hand, some cons of this development can lead to many cons. **[1]** The first one is that taking a job from home cannot be motivating as there is no one to share work pressure with when they encounter difficulty and the same is the case with students. **[2]** Furthermore, some of them do not follow the work routine as they always sleep during the day and complete their tasks at night. As a result, this can lead to tremendous impacts on their health because they spend a great deal of time in the blue light of the technologies. For instance, even though my neighbor has a flexible workplace, I can see her fatigue whenever I inadvertently meet her.

**[1] : Ý chưa có bố cục rõ ràng nhé, [cannot be motivating] thì ảnh hưởng xấu nhiều không ? mình phải giải thích rõ thì mới cho thấy nó negative development**

**Ở đây mình đưa ý cho [workers] riêng luôn**

**[main idea] : cannot be motivating**

**[supporting idea] : no workplace to share with colleagues/ no communication → affect work productivity and performance**

**[2] : Idea này mình đang bị thiếu chặt chẽ nhé, với ý chính là [daily routine], rồi sau đó chủ yếu mình giải thích về [blue light] → thì sáng hay đêm thì blue light đều là vấn đề hết nhé**

**→ Ý nên là về [students] riêng**

**[main idea] : study only through the Internet hinders students' development**

**[supporting idea] : cannot share / debate/ directly give questions and get answers from teachers and friends**

In conclusion, **in spite of the disadvantages, like loneliness or health problems I mentioned above, I still believe that this is a positive development.**

**⇒ bài này đang sai cách viết task response nha nếu mình muốn phân tích cả 2 mặt positive, negative thì mình ghi luôn trend này là positive = negative, xem lại cách làm dạng bài này**

**Tham khảo sửa lại bài mình đúng bố cục positive = negative sẽ như sau:**

*Given the advancements in technology, the decreasing cost and increasing availability of computer systems have spurred a rising trend where more adults are working from home and more children are pursuing their education remotely. I believe that this trend carries both positive and negative aspects.*

*On the one hand, working and studying from home offer several advantages. A key benefit is the convenience it brings. By working remotely, adults can save time and money on commuting, allowing for more family time and personal activities. Furthermore, the flexibility that remote work and study provide can enhance work-life balance. For students, online learning promotes independence and self-discipline. They have the opportunity to attend virtual classes, access a wide range of resources online, and engage in self-guided learning, which can develop critical thinking and problem-solving abilities.*

*On the other hand, this shift also presents some drawbacks. For employees, not having a traditional office environment can lead to decreased motivation and productivity due to the lack of in-person interaction with colleagues for idea-sharing and support. This isolation can negatively affect their performance and job satisfaction. Likewise, students may face challenges in their educational development when deprived of face-to-face interaction with teachers and peers. The lack of real-time discussions, immediate feedback, and collaborative opportunities can restrict their learning experience and social growth.*

*In conclusion, I believe that this trend has both positive and negative implications.*
