

Discussion talk on alternative energy

1. Learn about new alternative energies with this [video](#).
 - a. Focus question: list one advantage and one disadvantage of each kind of energy.
2. Your company/government is looking into implementing one form of alternative energy. Your job is to present two forms of alternative energy and then to recommend one of them in a 3-5 minute presentation. Make sure that your talk includes the following flow:

Issue: Why is the entity looking to use alternative energy?

Sides: Which forms of alternative energy might be suitable? What are the pros and cons of each one?

Resolution: Which form is best suited for the need that is introduced in the Issue stage?

3. Use these [phrases](#) to help structure your presentation and help your audience 'navigate' your talk. Check out these [great body language slides](#).

You will be assessed using [this framework](#).
