Email 1: Payoff Mortgage + Line of Credit

Subject: Help Your Retired Clients Eliminate Payments + Add a Growing Line of Credit

Hi [Advisor Name],

I recorded a quick video showing how one of your retired clients could eliminate their mortgage payment and unlock a growing line of credit—all while preserving their investment portfolio.

In this scenario, the client:

- Paid off a \$300K mortgage using a reverse mortgage
- Freed up \$1,800/month in cash flow
- Gained access to an \$80K+ line of credit that grows over time

I've attached the HECM Tool Report (PDF) to show you exactly how the numbers work.

Email 2: Short-to-Close with Cash Injection

Subject: Reverse Strategy to Eliminate Mortgage with a One-Time Cash Injection

Hi [Advisor Name],

This quick video outlines a real client scenario where the reverse mortgage didn't fully cover their traditional mortgage—but still made excellent sense.

Here's how it worked:

- The client had a \$450K traditional mortgage
- Reverse proceeds covered \$300K
- They brought in \$150K to close
- Eliminated a \$2,200/month mortgage payment

Even with a short-to-close, the monthly cash flow and retirement impact made this a smart move.

I've attached the HECM Tool Report (PDF), and you can watch the full walk-through here:

Email 3: Reverse for Purchase to Retain Investments + Boost AUM

Subject: Home Purchase Strategy That Preserves Retirement Accounts + Increases AUM

Hi [Advisor Name],

Ever had a client withdraw a large sum to buy a home in retirement?

This 3-minute video shows a smarter way to do it—using a Reverse for Purchase strategy to:

- Buy a new home without drawing from investment accounts
- Eliminate the need for monthly payments
- Keep retirement funds intact (and under your management)

In this case, the client boosted their purchasing power without touching their portfolio.

I've attached the HECM Tool Report PDF with side-by-side numbers for clarity.
