PRODUCT TESTING FEEDBACK
| UX | STABLEBONDS WITH ETHERFUSE

USER DETAILS:

✅Solana Wallet address for interacting:
BYG8uhBXUrgzs3pjtiaWv1PZSLtubo2VB3EDxeaHCfgw

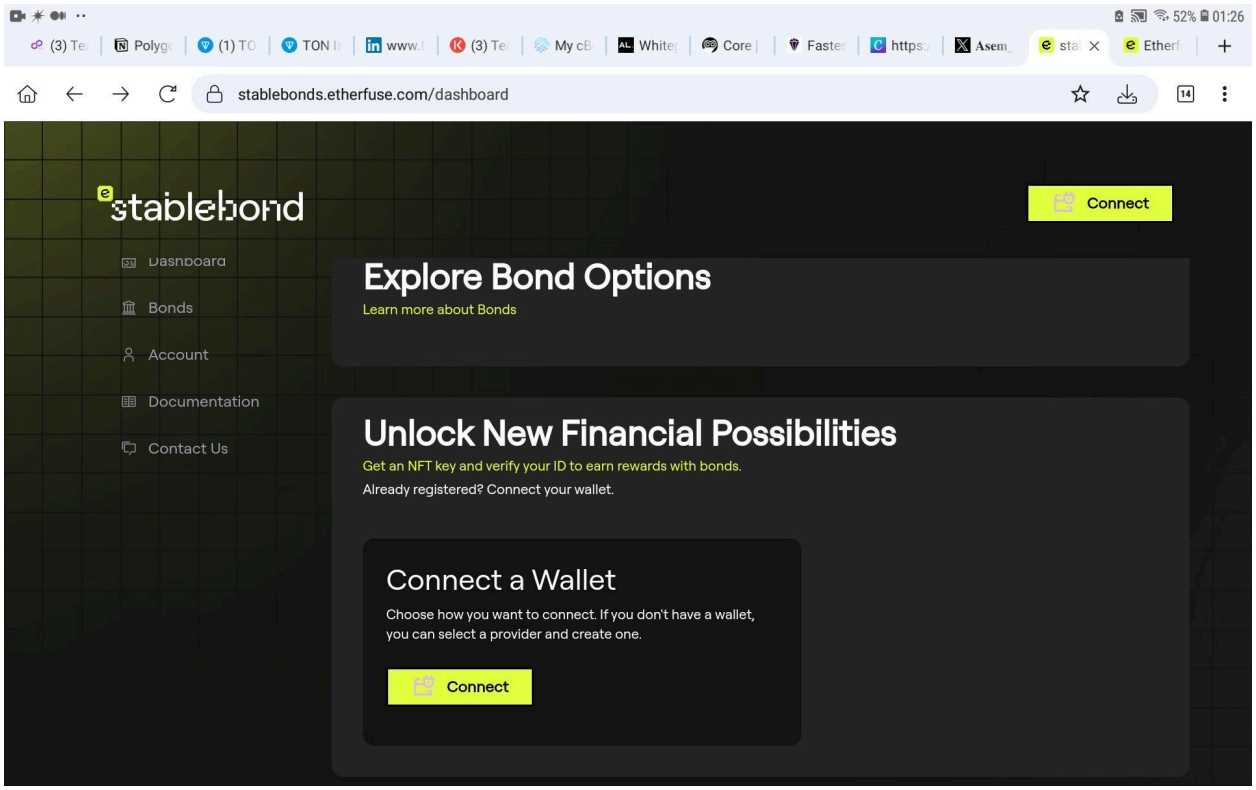

Name: Asemcrypt
Portfolio: https://linktr.ee/asem5
Telegram: Asemcrypt

✳ Devices Used for TESTING: HP Compaq Laptop, Samsung Tablet and infinix Hot 30 Play 8G RAM 128GB ROM

FEEDBACK SECTION:
🍷DURING SIGN UP: I successfully signed up using my solana - SOLFLARE WEB3 WALLET. No network glitch was observed. Sign up had no challenges using soflare wallets on the three devices tested.

🍷TESTED DEVICES
I tested the phone to connect my wallet through solflare browser and it was connected successfully although there was little delay compared to when I used my Laptop. My wallet connection also worked on my tablet but was slower too.
Soflare wallet was super fast using my laptop ✅

🍷USER INTERFACE

The user interface is cool, fast and easy to navigate ✅

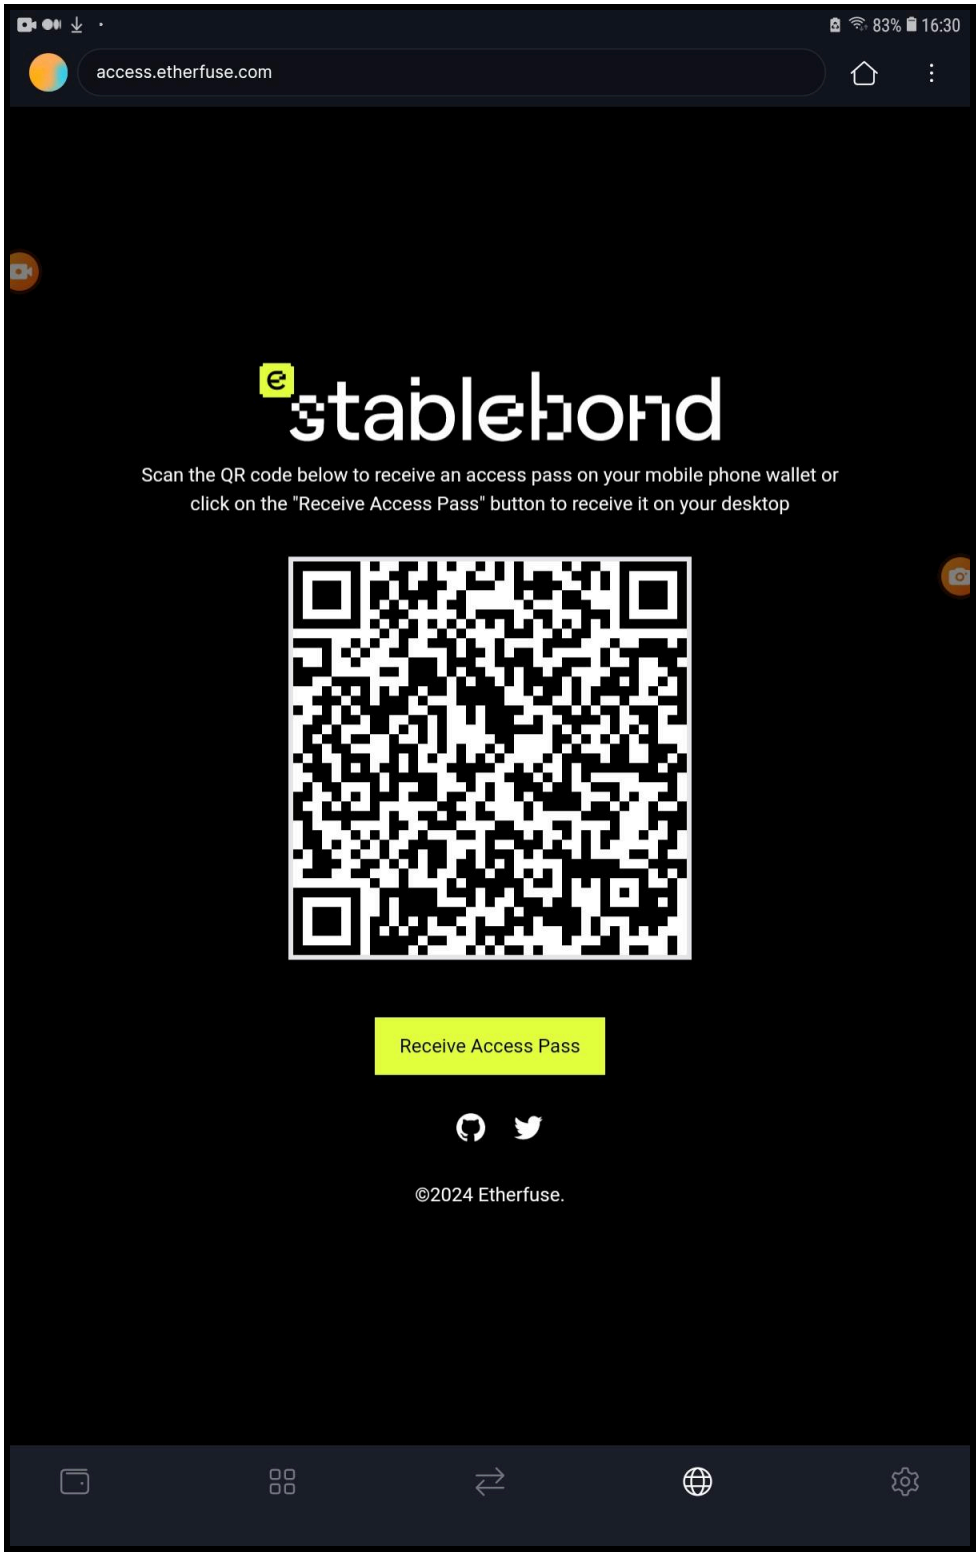

Although no options to switch modes to light mode❌

SUGGESTION:
‘Switch Mode’ Option should be added to further satisfy users visual need❌

🍷KYC VERIFICATION
The KYC was fast . Took me 5 - 8 minutes during VERIFICATION of my documents , personal details and facial VERIFICATION. Document requirements were okay by me because it has more options to choose from.

SUGGESTION:
2FA should be added to further enhance security to build users confidence ❌

🍷ACCESS NFT CLAIM

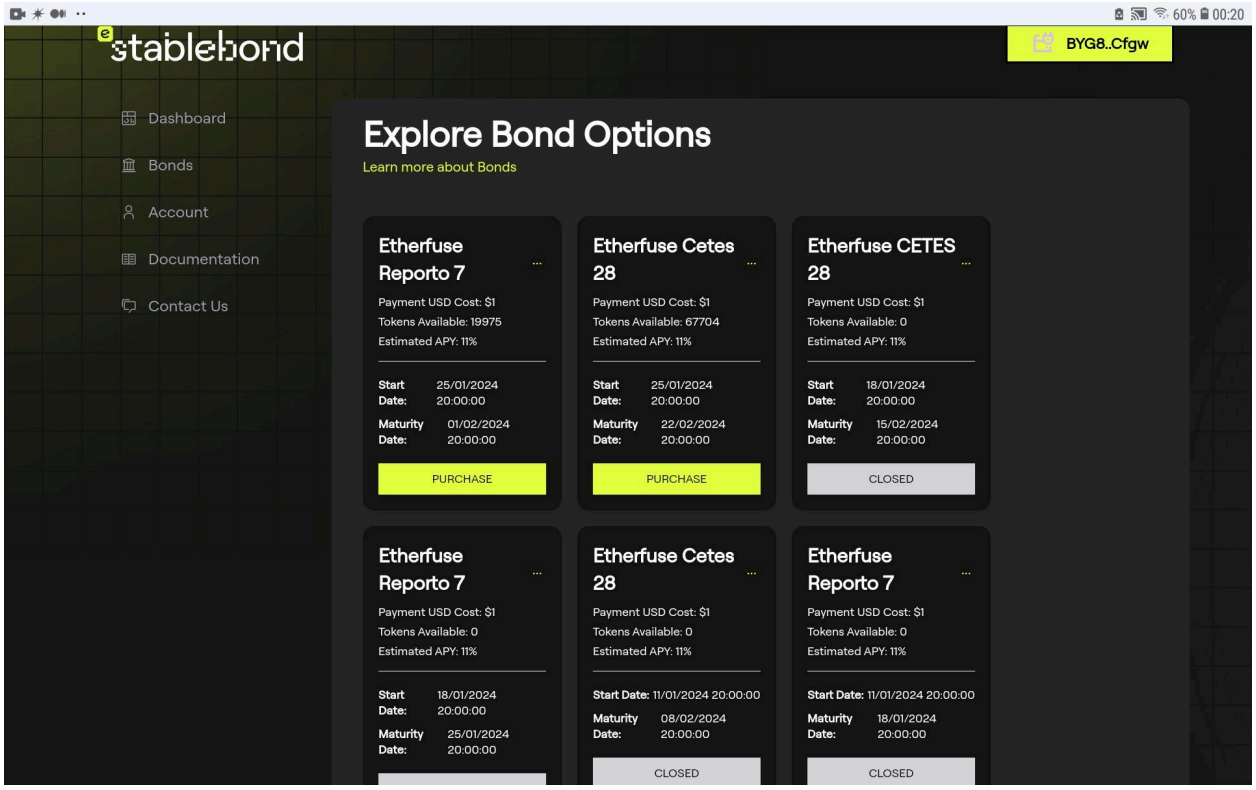

While I was trying to use the ‘Receive access pass’ on my laptop, the link provided didn't go through.

I later snapped the QR code on my tablet and scan it, which was perfect ✅

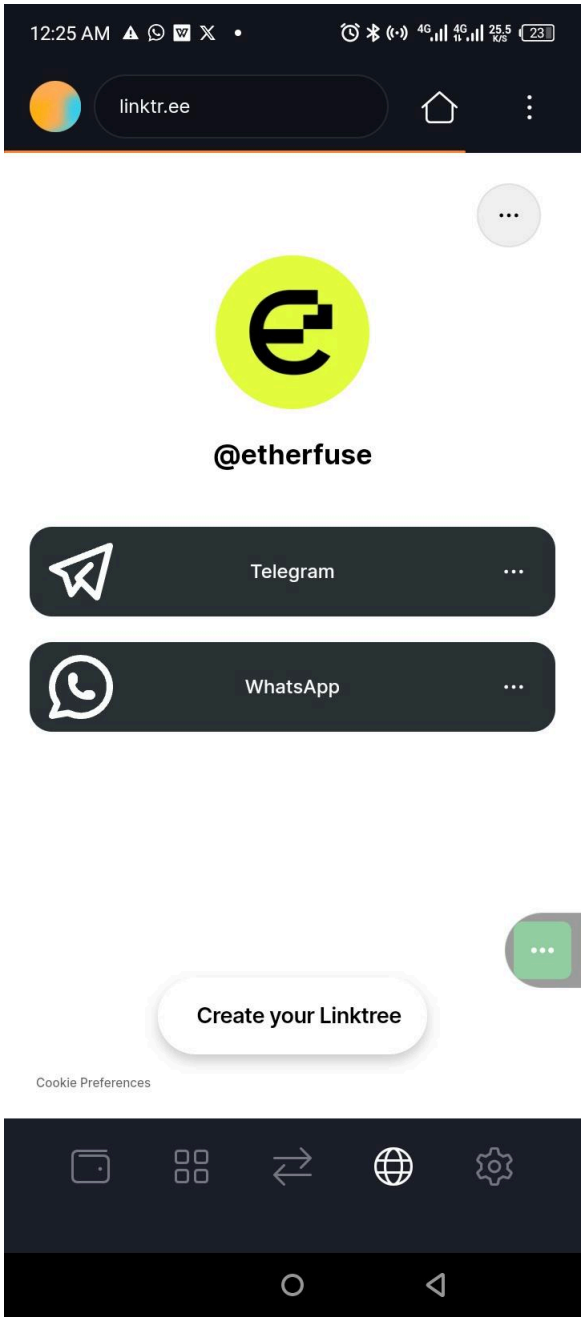

🍷STABLE BONDS PURCHASE 👇
The purchase of my Bond ‘Etherfuse Reporto 7’ was successful without delay after I fund my wallet,
I purchase the Etherfuse Reporto 7 at the cost of $1 with added gas fee of less than $0.3✅

Only two bonds options were available on the “Explore Bond Option” out of 23 Bonds
Although the available quantity as at the time of purchase ‘Etherfuse Reporto 7’ was 67704 which was enough to feed many.

SUGGESTION:
More options should be provided to allow users choose their choices ❌

🍷THE ONLINE CONTACT SUPPORT OPTION
I tried using the online support with my Laptop, tablet and phone but It was reachable. It showed me telegram and WhatsApp options .
Clicking on both gave me a prompt of “webpage not available”. ❌

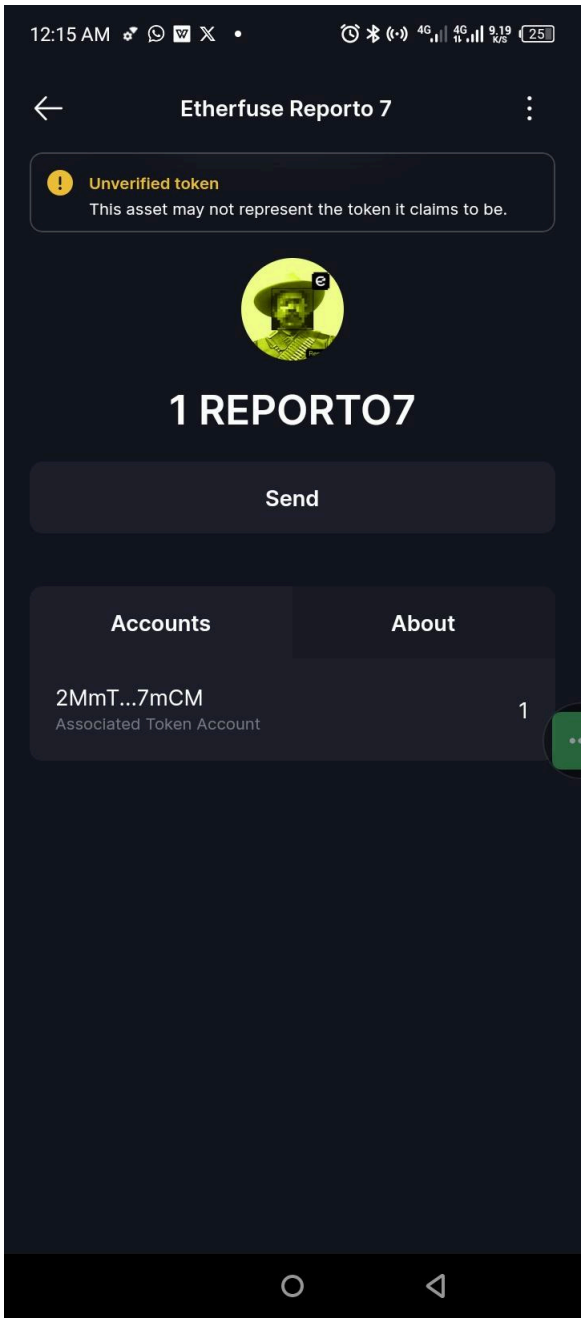

SUGGESTIONS:
Online support with bot and human can be added to fasten the communication time for users in case of emergency purpose. ❌

🍷LANGUAGE OPTIONS
Just few languages was seen ❌.

SUGGESTION:
More language options should be added. This could help countries how can only communicate with their local languages to be able to navigate STABLE BONDS platform easily

🍷ASSET DETAILS ON SOLFLARE WALLET
The asset Etherfuse Reporto 7 on solflare wallet had a prompt showing “Unverified token”

SUGGESTION:
This should also be looked into for compatibility after purchase of BONDS

🌍In Conclusion :
STABLE BONDS is super fast and easy to navigate. This will be best for users if the stated issues ❌ is resolved ✅

Android and IOS should be made very compatible with the platform as this is very easy for users to use since it is handy and very easy to use.

Wider marketplace should be added so it can bring in more users who love trading

More features should be added especially the
✅FREQUENTLY ASKED QUESTIONS “FAQS”
✅CUSTOMER SUPPORT:BOT AND HUMAN
✅ SWITCH MODE
✅ MAYBE CHAT-ROOM FOR USERS
✅LEADERBOARD
✅TASK-TO-EARN
✅ REFERRAL BONUS
✅ etc
