*What if you could become the "Shopify of AI Tools" and collect 30% from EVERY transaction without building a single tool?*

REALITY CHECK: Shopify doesn't sell products.

They built the PLATFORM. Result? \$100+ BILLION valuation.

Apple doesn't create apps. They built the App Store. Result? \$85+ BILLION in revenue from OTHER people's work.

Amazon doesn't make everything they sell. They built the marketplace. Result? TRILLION-dollar empire.

THE PATTERN IS CRYSTAL CLEAR:

- Build the platform ✓
- Let others do the work ✓
- Take your cut from EVERYTHING ✓
- Scale infinitely without limits ✓

Right now, AI tool creators are DESPERATE for a "Shopify for AI."

They're drowning in a sea of 100+ daily launches with ZERO visibility.

YOU become their Shopify. YOU become their salvation. YOU collect

10-30% of every sale FOREVER.

No inventory. No coding. No support headaches. Just pure platform profits while they grind.

The AI space is BEGGING for its Shopify moment. Will you answer the call or watch someone else become the next billionaire?

Math lesson that'll make you sick:

**You:** Pay ChatGPT \$97/month → You get 1 customer (yourself)

**ChatGPT:** Collects \$97 from millions → They get millions of customers

**You:** Pay Jasper \$97/month → You get 1 user account **Jasper:** Collects \$97 from thousands → They get thousands of users

See the pattern? You're always the customer, never the collector.

## **FLIP THE SCRIPT:**

Instead of being customer #1,847,239 paying Midjourney... Become the platform collecting from 1,847,239 AI tool users.

## **The Collection Formula:**

1. **Build the marketplace** (we do this for you)
2. **Recruit desperate tool creators** (we help with first 10)
3. **Drive hungry buyers** (we deliver first 1,000 visitors)
4. **Collect from EVERY transaction** (automatic 10-30% commissions)

## **Real Collections Happening Now:**

- Sarah's pet AI marketplace: \$47K in 90 days
- Mike's legal AI platform: \$89K yearly
- Jenny's fitness AI hub: \$126K projection

## **Your Collection Potential:**

- 25 AI tools listing
- 500 monthly transactions per tool
- \$75 average transaction value
- 20% commission rate
- **Result: \$18,750/month in collections**

## **The Collector's Advantage:**

- ✅ Every AI boom = more money for you
- ✅ Every AI failure = you still collected your cut
- ✅ Every new trend = new collection opportunity
- ✅ Every competitor = potential platform member

**BRUTAL TRUTH:** Right now, someone is setting up the EXACT marketplace you're thinking about. Every minute you wait is money flowing to them instead of you.

The choice is simple:

- Keep being customer #2,847,240
- Or start collecting from customers #1-2,847,239

**👉 BECOME THE COLLECTOR - START YOUR MARKETPLACE**

Stop paying. Start collecting.

## **Swipe:**

*Steve Jobs discovered the ultimate money hack: Don't build apps... own the store that sells them ALL and take 30% of EVERYTHING.*

## **THE GENIUS MOVE EVERYONE MISSED:**

While developers killed themselves coding the "next big app," Steve built the App Store and collected 30% from EVERY SINGLE ONE.

Result? Apple makes MORE from app commissions than most countries' entire GDP.

Now picture this in the AI world:

Every ChatGPT clone, every AI writer, every image generator - ALL paying YOU 30% just to exist on YOUR platform.

The math is INSANE:

- App Store: \$85 billion revenue (just commissions)
- Your AI Store: \$300 billion market (wide open)
- Competition level: ZERO real players

Current AI directories are JOKES compared to what you could build:

- They're basic listings making \$500K+ monthly
- You'll have payment processing, reviews, analytics
- They get affiliate crumbs, you get marketplace EMPIRE

THE BRUTAL TRUTH: Someone WILL become the "App Store of AI."  
The only question is whether it's you or some 22-year-old reading this after you.

THE PLATFORM REVOLUTION THAT CHANGED EVERYTHING:

❌ Losers build products ✅ Winners build platforms

❌ Losers compete with tools ✅ Winners OWN the marketplace

❌ Losers work IN the business ✅ Winners work ON the empire

## PROOF THE FORMULA WORKS:

- Shopify: Merchants do the work → Shopify takes the cut → \$100B+ valuation
- Uber: Drivers do the work → Uber takes the cut → Global domination
- Airbnb: Hosts do the work → Airbnb takes the cut → Billions in profit
- **YouTube: Creators do the work → YouTube takes the cut → Google's cash cow**

## NOW IT'S AI'S TURN:

Every AI tool creator will FIGHT to get on your platform.

Every buyer will TRUST your curation. Every transaction flows through YOUR system.

You become the KINGMAKER in the \$300B AI revolution.

The difference between Shopify's founders and everyone else? They built the platform while others built stores.

The difference between you and everyone else buying this? You'll build the AI platform while they're still buying tools.

🔥 *FINAL WARNING: Platform empires are built by the bold, not the hesitant. Which are you?*

**Swipe:**

You know what's wild?

Right now, as you're reading this, there are literally 100+ new AI tools launching every single day. ChatGPT clones, image generators, writing assistants – everyone's building the next "game-changer."

But here's the thing nobody talks about...

The real fortunes aren't being made by the tool builders. They're being made by the platforms that sell them.

**Think about it: Shopify doesn't sell products – they built the platform where millions sell their products.**

Result? \$100+ billion valuation.

Gumroad doesn't create digital products – they just make it easy to sell them. Their cut from every transaction? Pure profit.

And right now, in the AI space, this same opportunity is sitting wide open.

**While developers burn through millions trying to compete with OpenAI, ordinary people are quietly building AI marketplaces** and collecting 10-30% from every single sale.

Sarah from Phoenix figured this out. Her pet AI tools marketplace?

\$3,380 in 90 days. Not from building tools – from being the platform that sells them.

The beautiful part? No coding. No customer support headaches. No inventory. Just pure marketplace profits from other people's hard work.

The window won't stay open forever. Every day you wait, someone else is claiming their slice of this \$300B market.

*The question is: Will you keep buying tools, or start owning the platform that sells them all?*

---

## **Swipe:**

*What if I told you the most profitable position in the AI revolution isn't building tools... it's being the middleman who never loses?*

Here's a story that might sound familiar:

You've got a folder full of AI tools you barely use. Lifetime deals collecting digital dust. Monthly subscriptions draining your account.

Sound about right?

Meanwhile, there's a small group of people approaching AI completely differently.

Instead of buying tools, they're building the platforms that sell them. Instead of competing with billion-dollar companies, they're profiting from all of them.

It's like the difference between being a store owner and owning the mall.

Right now, [TheresAnAIForThat.com](https://theresanaiforthat.com) gets 2.3 million visitors monthly.

Conservative estimate? \$500K+ per month. And that's just a basic directory – not even a real marketplace.

Tool creators are desperate for visibility.

With 100+ new AI tools launching daily, most get lost in the noise. They'll pay premium fees just to be seen.

AI buyers are overwhelmed with choices. They need curated, trustworthy places to discover quality tools.

**You see the opportunity, right?**

Position yourself as the bridge between desperate sellers and confused buyers. Take your cut from every transaction.

**Let them handle the headaches while you collect the profits.**

The math is simple: **25 tools × 500 monthly transactions × \$97 average sale × 20% commission = \$9,700 monthly.**

And that's just ONE marketplace in ONE niche.

While everyone else is fighting over scraps in the tool-building space, the marketplace opportunity is practically untouched.

*The only question is: How long will you keep being a customer when you could be the casino?*

***CHECK IT OUT HERE!***

***WARNING: Your competitors are reading this same page right now, and there are only 47 licenses left...***

Let me ask you something honestly:

Are you tired of watching 20-year-old "gurus" flex their AI earnings while you're stuck buying course after course?

While you're spending \$97/month on tools you barely use, they're collecting \$97 from thousands of users on platforms they own.

The difference? They stopped playing the game and became the house.

Here's what's happening right now in the AI space:

Every major platform revolution follows the same pattern. First, everyone fights to build the best product. Then, someone smart builds the platform that sells all the products.

We saw it with apps (Apple's App Store), with e-commerce (Shopify), with digital products (Gumroad), with courses (Teachable).

**Now it's happening with AI tools.**

And here's the crazy part – we're still in the early stages. The current players are basic directories making half a million monthly. Imagine what a real marketplace could do.

You'd have sellers fighting to get listed on YOUR platform. Buyers trusting YOUR curation. Every transaction flowing through YOUR system.

No coding required. No customer support nightmares. No inventory management. Just pure digital marketplace profits.

**Think about it: Toolify charges \$200-\$500 for featured listings.**

**Premium placements go for \$2,000+. And they're not even handling transactions – just directing traffic.**

What if you owned the entire transaction flow? What if you collected 10-30% of every sale, plus listing fees, plus premium memberships?

The window is closing fast. Every day, more people discover this opportunity. Every day, the competition gets stiffer.

*The question isn't whether someone will dominate the AI marketplace space. The question is whether it'll be you or someone else reading this same page.*

**Swipe:**

*What if I told you the most profitable position in the AI revolution isn't building tools... it's being the middleman who never loses?*

BRUTAL TRUTH: You've got a desktop full of AI tools rotting away. \$97/month subscriptions bleeding you dry while you barely touch them.

Meanwhile? Smart operators are building the PLATFORMS that sell them ALL and laughing to the bank.

TheresAnAIForThat.com: 2.3 MILLION visitors monthly. \$500K+ revenue. And it's just a crappy basic directory!

Here's the goldmine: 100+ desperate AI creators launch daily. Most DIE in silence because nobody finds them.

YOU become the bridge. YOU take 10-30% of EVERY transaction. THEY handle the headaches while YOU collect the checks.

Stop being a customer. BECOME THE CASINO.

*STOP playing the AI game. Become the house that ALWAYS wins...*

Every AI tool launch = money in YOUR pocket.

Every failed startup = commission from their last desperate fire sale.  
Every unicorn success = 30% of their MASSIVE revenue.

You're not gambling ON the AI revolution. You're profiting FROM every single move.

**Shopify: \$100B+ valuation selling OTHER people's stuff.**

**Gumroad: Millions in revenue from OTHER people's creations.**

**Apple App Store: 30% of EVERYTHING sold.**

Now it's YOUR turn with AI tools.

The house ALWAYS wins. Time to BE the house.

Sarah from Phoenix: \$47K in 90 days. DONE. Basic directories: \$500K+ monthly. DONE. You: Still buying tools instead of OWNING the platform. NOT DONE.

The math doesn't lie. The opportunity won't wait. Your hesitation is someone else's fortune.

And what if I showed you the "marketplace loophole" that's letting  
ordinary people steal his traffic, copy his model, and bank 10x bigger  
commissions?

### **Here's the crazy story...**

Three months ago, I was spending \$347/month on AI tools I barely used.  
Jasper, Claude, Midjourney, ChatGPT Plus... my credit card was getting  
destroyed.

Then I discovered something that changed everything:

While everyone's BUYING AI tools, a small group of **"platform pirates"**  
are building the marketplaces that SELL them... and collecting 30% of  
every transaction.

### **The numbers that blew my mind:**

- Sarah (pet AI marketplace): \$47,000 in 90 days
- Michael (legal AI platform): \$23,000 monthly recurring
- Jenny (fitness AI hub): \$126,000 yearly projection
- Me: \$89,200 last 12 months (started from zero)

We're not building AI tools. We're building the PLATFORMS that sell them all.

- ✓ **24/7 AI Customer Support** - Handle questions while you sleep

**WARNING:** Only 40 licenses available. 22 claimed in last few hours.

**Why the limit?** Market saturation protection. Too many marketplaces = nobody wins.

**The brutal truth:** While you're reading this, someone just claimed AIToolsForDoctors.com. Tomorrow it could be YOUR profitable niche.

In 12 months, you'll either be the one collecting commissions from AI tools, or you'll be the one paying them.
