SUMMARY

- I'm a Full Stack Developer working primarily in the MERN stack (MongoDB, Node/Express, React). I enjoy building scalable, maintainable system architecture. I recently worked as a Lead Full Stack Engineer at a startup called Plantbase.io along with a team of developers and designers. Plantbase.io is a full stack application written in the MERN stack, and it's designed to help people find vegan products. Currently, I'm learning React Native (for iOS and Android Development), the Apollo implementation of GraphQL, TypeScript, and AWS.

WORK EXPERIENCE

TRILOGY EDUCATION SERVICES, LOS ANGELES, CALIFORNIA
UCLA Coding Bootcamp Teaching Assistant, Aug 2018 - Present

- Helping students learn to think like a developer, i.e. define code problems, refer to documentation, and develop solutions.

PLANTBASE.IO, LOS ANGELES, CALIFORNIA
Lead Full Stack Engineer, Feb 2018 - Apr 2018

- Created efficient and easy to understand full-stack application architecture from the ground up in a high velocity environment.
- Worked with UX/UI designers, building prototypes into a fully functioning application.
- Developed internal tooling for non-developers to perform full CRUD operations on the database.

EDUCATION

BERKLEE COLLEGE OF MUSIC, BOSTON, MASSACHUSETTS
Music Business (Marketing), May 2017
- GPA: 3.57

BERKLEE COLLEGE OF MUSIC, BOSTON, MASSACHUSETTS
Electronic Production & Design, May 2017
- GPA: 3.57

ADDITIONAL SKILLS

React.js	GraphQL	Materialize
Express.js	Sequelize	AJAX
Node.js	jQuery	JSX
MongoDB	Ruby on Rails	Jasmine
Mongoose	AWS	React Native
SQL	Git	EJS & ERB
postgreSQL	Bootstrap	HTML5
mySQL	Semantic UI	CSS

ENDORSEMENTS

eric@eaze-co.com - Eric Vince, Plantbase.io

PROJECTS

MERN-reminders (in progress) - A full stack application made for sending reminders
- github.com/pfinazzo/MERN-reminders

Unstated Todos (in progress) – Simple Todo app but with unstated for global state management as an alternative to redux
- github.com/pfinazzo/unstated-todos
