

Antecedent (what happened right before) the Trigger	Behavior	Consequence (what happened right after) <small>At times you might check two (ex: block and redirection). Please be honest.</small>
<input type="checkbox"/> Request Denied (ex: said no)	<input type="checkbox"/> Physical Aggression Hitting with open or closed hand, kicking, biting, and/or throwing items with attempt to hit someone	<div> <input type="checkbox"/> Attention Talking with the student immediately after the engaged in behavior. Usually about the behavior           </div> <div> <input type="checkbox"/> </div>
<input type="checkbox"/> Request was given (ex: go sit down)	<input type="checkbox"/> Property Destruction Breaking items with both hands or gripping items and breaking against hard surface, or throwing items hard enough to break	<div> <input type="checkbox"/> Plan Ignoring Not making comments about the behavior, not making eye contact with student, might point to the area to which student needs to return           </div>
<input type="checkbox"/> Transitioning (ex: from play time to reading)	<input type="checkbox"/> Escape/avoidance Leaving activity, activity area, desk area, or classroom without permission. Also, dropping to the ground and/or not moving from area	<div> <input type="checkbox"/> Redirection Directing the student back to the activity, request, or area that they have left. (ex: first you return your sit then you can tell what is going on)           </div>
<input type="checkbox"/> Item denied (ex: toy was not available)	<input type="checkbox"/> Yelling/Screaming Talking above student's normal conversation volume during conversation or quiet surroundings	<div> <input type="checkbox"/> Blocked Student prevented from obtaining items/engaging in activity           </div>
<input type="checkbox"/> Alone (usually related to sensory)	<input type="checkbox"/> Non-compliance Not responding to mastered question, not completing a master skilled task, not completed a master skilled request	<div> <input type="checkbox"/> Access to items Received item by another person, or grabbed item in the area student is in and starts to play with it or edible eats it           </div>
<input type="checkbox"/> Interruption from activity/reinforcer (ex: not finished with puzzle and told to move to next activity)	<input type="checkbox"/> Escape/avoidance of activity Throwing activity paper, finding excuse to leave area, drawing on paper or activity, putting head down and not working on paper	<div> <input type="checkbox"/> Break Giving the student time but returning to the activity           </div>
		<div> <input type="checkbox"/> Time-out Going to designated area once an undesirable behavior happens           </div>
<input type="checkbox"/> Sensory Overload This could be all the lights on, too much noise, not enough noise, certain texture of item, etc.	<input type="checkbox"/> Self-Injurious behavior Scratching self, pulling on body parts, and/or biting self	<div> <input type="checkbox"/> Isolation Going to an area where there is no one and/or no items in the area           </div>
	<input type="checkbox"/> Crying/Whining Tears coming down face, huffing and puffing, and/or high pitch one outside of a typical context (ex: told no -> crying)	<div> <input type="checkbox"/> Moving on Student leaves the activity, or isn't doing the activity and is not requested to go back to activity           </div>
