absence of harmful contaminants. That commitment spans across our entire product options, including Pre-rolls, Vapes & Concentrates, Pet CBD Products, flower, edibles, and more. The result: reliable, reproducible results for both recreational consumers and medical patients.

Concentrates You Can Trust

Rosin Cartridges & Live Resin

One hallmark of our concentrate collection is the availability of Rosin Cartridges — solventless, flavor-forward, and potent. These cartridges provide clean hits that emphasize natural terpenes without residual chemicals. Alongside these, Everest carries a variety of live resin, live rosin, wax, shatter, diamonds, and sauce styles, each curated to highlight flavor profiles and effect.

Delta-9 THC Potency

Many of our concentrates prominently feature Delta-9 THC at high concentrations, allowing users to achieve elevated effects in smaller doses. These products suit experienced consumers who demand potency and efficiency. Through third-party lab testing, we confirm that each lot's Delta-9 THC levels are accurate and safe for consumption.

Who We Serve: Adult Use & Medical Marijuana

Everest operates legally under Adult Use regulations in New Jersey. Though we are not currently a licensed Medical Marijuana provider, our inventory and services remain well-suited for medical patients seeking symptom relief or targeted dosing—especially through concentrates known for fast absorption.

We treat every visitor with the same level of diligence and care, whether you're here for recreational exploration or wellness reasons. Our offerings include Medical Marijuana-friendly product forms (e.g. concentrates, vapes, tinctures) and informational support through personalized consultations.

Personalized Consultations & Patient Education

Navigating concentrates and dosing can be intimidating. That's why Everest offers personalized consultations to guide you through selecting the right product options for your needs. During

these sessions, you'll receive guidance on potency, method (vaping, dabbing, etc.), expected onset, and safe use. We emphasize patient education so you can enjoy your experience responsibly.
