NE OBJEKTAS, O MOMENTAS

Universalus promptas

Create a editorial lifestyle photograph of [subject] in [location], captured during a quiet in-between moment after real activity has already happened. The subject should not look posed. Use natural expression, visible work traces, lived-in background details, realistic texture, imperfect but tasteful composition, and documentary realism. The image should feel like a real moment from a story, not a clean stock photo.

Keywordai

editorial
in-between moment
window light
natural expression
dirty hands
work traces
lived-in background
imperfect composition
documentary realism
no stock polish

BUITEKAS

Universalus promptas

Create a amateur phone snapshot of [subject] in [ordinary home situation], captured in the middle of a small everyday mess or accident. Make it feel spontaneous and unplanned, with real-life chaos, imperfect framing, awkward phone angle, visible mess traces, cluttered background, and genuine emotion. The image should feel like something that actually happened, not a staged lifestyle scene.

Keywordai

real-life chaos
messy evidence
imperfect selfie

ordinary home
genuine emotion
cluttered background
accidental framing
visible traces
unplanned moment
no clean setup

GYLIS

Universalus promptas

Create a editorial photograph of [subject] in [environment], using strong visual depth. Include a foreground layer, a clear middle-ground subject, and background context. Frame the image with slight asymmetry, negative space, depth separation, and a sense of looking through the environment. The composition should feel immersive, layered, and intentional, not flat or centered.

Keywordai

foreground layer
depth layers
frame within frame
negative space
background context
visual flow
immersive composition
asymmetry
depth separation
environmental story

JUDESYS

Universalus promptas

Create a action photograph of [subject] doing [movement], captured mid-action with controlled motion blur. Use a panning-shot feeling, background streaks, shutter drag, imperfect timing, and kinetic energy while keeping the subject readable. The image should feel alive, fast, and physically present, not frozen like a static pose.

Keywordai

motion blur
panning shot
shutter drag
kinetic energy
captured mid-action
speed feel
dynamic frame
background streaks
imperfect timing
alive moment

BOKEH

Universalus promptas

Create a cinematic portrait of [subject] in [environment], using shallow depth of field and creamy bokeh. Keep sharp focus on the eyes or main subject, with soft background blur, smooth focus falloff, subject separation, and warm blurred highlights in the distance. The background should remain as atmosphere, not visual noise.

Keywordai

shallow depth of field
creamy bokeh
subject separation
wide aperture
background blur
focus falloff
eye focus
portrait lens
soft highlights
cinematic portrait

ATMOSFERA

Universalus promptas

Create a cinematic atmospheric image of [subject or location] in [setting], transformed by weather or air conditions. Use mist, fog, rain, haze, low visibility, moody weather, and volumetric atmosphere to create depth, mystery, and emotion. The atmosphere should shape the whole image, making the scene feel memorable instead of clean and empty.

Keywordai

atmospheric haze
