

Maxim Bozhik

Frontend / Fullstack Developer

Saint-Petersburg, Russia | +7 (995) 120-0313 | bozzhik@gmail.com | telegram: @bozzhik | site: bozzhik.com

OBJECTIVE: Experienced Frontend Developer with fullstack experience and a track record of building modern, high-performance web applications that deliver seamless user experiences and drive business results. Specializing in React/Next.js ecosystems with TypeScript for optimized development. Eager to join a dynamic team in a product-focused company, contributing to faster delivery, higher user satisfaction, and measurable product growth.

WORK EXPERIENCE: **FRONTEND DEVELOPER** June 2025 – Present
Worthunt, Remote (Global-based)

- Developed scalable dashboards for creators using Next.js and React, integrating real-time monetization features with TypeScript for type-safe code.
- Optimized backend integrations with Supabase (PostgreSQL), reducing data query times by 20% through efficient schema designs.
- Implemented caching with Upstash Redis for user sessions, improving application performance by 25% in high-load scenarios.
- Coordinated cross-functional teams, gathering requirements from stakeholders and automating workflows with self-hosted n8n integrations.
- Led technical interviews for candidates, assessing skills in Next.js and TypeScript.
- Tested components with Jest and React Testing Library, achieving 85% code coverage and minimizing production bugs.
- Deployed applications using Docker and CI/CD (GitHub Actions), ensuring minimal downtime during updates.

FRONTEND DEVELOPER July 2023 – May 2025
Cybershoke.net, Remote (Russia-based)

- Led development of gaming server dashboards using React/Next.js and Tailwind CSS, handling high-traffic user stats and profiles.
- Optimized Redis for real-time session management and PostgreSQL for leaderboards, reducing latency by 25% in multiplayer features.
- Integrated Node.js backend APIs for dynamic data fetching, improving user engagement by 30% through seamless interfaces.
- Coordinated with stakeholders on Agile sprints, using analytical thinking to prioritize features and track milestones.
- Led technical interviews and candidate assessments, evaluating frontend skills in React and problem-solving.
- Implemented comprehensive tests with Jest, React Testing Library, and Cypress, reducing production bugs by 30%.
- Automated internal processes with self-hosted n8n, integrating game APIs for operational efficiency.

FRONTEND DEVELOPER

September 2022 – June 2023

Gather Town, Remote (US-based)

- Built interactive virtual office interfaces with React and TypeScript, focusing on responsive designs for team events.
- Integrated Node.js endpoints with PostgreSQL/Redis databases, enhancing real-time collaboration features by 20%.
- Optimized styling with Tailwind CSS and SCSS, boosting mobile engagement metrics by 25% in A/B tests.
- Collaborated on cross-functional teams, communicating with stakeholders to gather requirements and automate tools using n8n.
- Performed performance optimizations using Core Web Vitals, reducing load times by 20%.
- Tested UIs with Jest and React Testing Library, ensuring quality and accessibility standards.
- Deployed via Docker and Vercel/Netlify with CI/CD (GitHub Actions), streamlining updates.

FULLSTACK DEVELOPER

September 2021 – August 2022

DecaLabs, Remote (Global-based)

- Developed custom SaaS tools using Node.js/Express backend and React/Next.js frontend, managing state with Zustand/Redux.
- Integrated MongoDB/Redis for data persistence, optimizing queries to cut response times by 20%.
- Built REST/GraphQL APIs with TypeScript, ensuring scalable integrations for client projects.
- Coordinated project planning, gathering requirements and tracking milestones in Agile environments.
- Tested fullstack features with Jest and Cypress, achieving high code coverage.
- Deployed applications with GitHub Actions CI/CD, reducing deployment errors by 25%.
- Automated business processes with self-hosted n8n, improving team efficiency.

FRONTEND DEVELOPER (Internship)

March 2021 – August 2021

Starnet, Moldova

- Assisted in building responsive web interfaces using React and JavaScript, contributing to telecom dashboards.
 - Implemented state management with Redux, reducing component re-renders by 15%.
 - Styled components with CSS/SCSS for mobile-first designs, ensuring cross-browser compatibility.
 - Integrated REST APIs from Node.js backend, handling data in React components and improving data flow efficiency by 20%.
 - Performed performance optimizations with Core Web Vitals, improving load times by 20%.
-

-
- Participated in Agile stand-ups and code reviews, collaborating on bug fixes.
 - Wrote unit tests with Jest, maintaining code quality and reducing testing time by 15%.
-

EDUCATION:	MASTER'S DEGREE IN UX ANALYTICS (DATA SCIENCE)	September 2025 – Present
	Higher School of Economics, Saint-Petersburg, Russia	
	BACHELOR'S DEGREE IN DESIGN AND PROGRAMMING	September 2021 – June 2025
	Higher School of Economics, Moscow, Russia	

SKILLS:	• Programming Languages: JavaScript (ES6+), TypeScript, Python, Go, Ruby • Frontend: React, Next.js, Redux, Zustand, Tailwind CSS, CSS, SCSS, Electron, React Native (Expo) • Backend: Node.js, Gin, Ruby on Rails, REST APIs, GraphQL • Databases: PostgreSQL, MongoDB, Redis, SQLite • Tools & Platforms: Git, npm/yarn/pnpm/bun, VS Code, Docker, AWS/Cloudflare/Vercel/Netlify/Render/Coolify, CI/CD pipelines, CMS and CRM systems • Testing & Quality: Jest, Vitest, React Testing Library, Cypress • Other: Responsive Design, Performance Optimization (Core Web Vitals), Cross-browser Compatibility
	• Team collaboration and cross-functional coordination • Technical interviewing and candidate assessment • Business process automation (n8n workflows, integrations) • Communication with stakeholders and clients • Analytical problem-solving and requirements gathering • Project planning and milestone tracking • Agile methodologies (Scrum/Kanban) • Languages: Russian (Native), Romanian (Native), English (B2);
