

Mentor's note

Hello. I am Bindoo, Year 4 Teacher at Clavis International Primary School. I have thoroughly enjoyed working with Thomas and Toscane for their Exhibition project "Food Distribution." Their continuous enthusiasm and commitment is certainly commendable. I applaud their choice of project, as unequal food distribution and food wastage are major concerns across the world and need to be taken care of by everyone. Thomas and Toscane have had to shoulder multiple responsibilities and I would like to congratulate them as they took ownership of their learning largely. As researchers, they have been able to inquire locally (e.g. Panagora) and globally (Food Reformers – Denmark). Additionally, both of them have worked efficiently in connection with the 5 elements of the Primary Years Programme (PYP) which are concepts, knowledge, attitude, skills and action. I wish Thomas and Toscane plenty of success for their presentation and for all their future endeavors as lifelong learners.
