## EDUCATION

### Kocaeli University

BS in Computer Engineering(GPA: 3.6)

Kocaeli, Turkey

Graduation Date: June 2022

## WORK EXPERIENCE

### [Embedded Systems Laboratory](#), Kocaeli University

Kocaeli, Turkey

Software Engineer - Part-time

September 2020 – Present

- Contributed projects to facilitate students, professors, and administrative units' lives at Kocaeli University.
- Developed 5 Web Applications to reduce paperwork for both students and administrative units with .Net Core using the MVC pattern.
- Developed 3 Mobile Applications for Kocaeli University with Flutter.
- Supported Ph.D. students to finish their thesis.
- Mentored juniors about how to program, and helped their orientation with the team.

## VOLUNTEER EXPERIENCE

### Google Developer Student Clubs Flutter Days

Kocaeli University, Turkey

Speaker

March 2022

- I gave an introduction to [Dart](#) and [Flutter](#) in 2 days with 10+ live participants which resulted in 20+ likes and 100+ views in a month.

## PROJECTS

To learn more about my projects navigate to my portfolio with my [Personal Website](#) or scan the QR code.

[Akademilan](#) This website is my first freelance job and it's about publishing all open academic staff adverts in one place. I develop this website with .Net Core using the MVC pattern. I also configured the domain and hosting for this website. It was a wonderful experience to work with new customers since I could see real-life problems with hands-on experience.

[Car Rental](#) This project was a Bootcamp graduating project. I developed the back-end with Asp.Net Core Web API and I used the Angular framework for the front-end. I learned a lot about Cross-Cutting Concerns, authentication, and authorization. Since this project was approved by the tutor, it has 90 stars on Github.

[KOU Mobile](#) KOU Mobile is an app to follow Kocaeli University Student Information System from mobile devices. This was my first project with a team and we develop this project with Flutter. I learned how to manage states, how to make HTTP requests with SOAP, and how to use tokens to manage sessions. We release this app in Google Play Store for our university and right now it has 3000+ downloads with a 4.2 rating from 60+ users.

## SKILLS & INTERESTS

**Skills:** Web Development (Java Spring, Asp.Net Core using the Pattern MVC, Angular, React, Next.js, Node.js, Express.js) | Flutter | Relational Databases | NoSQL

**Interests:** Technology, Movies, Theatre, Jazz & Blues, Outdoor Activities
