

ACM Community Engagement Courses

Get active in the community and take ACM's "[community-engagement classes.](#)"

ACM community-engagement courses utilizing real-world experiences to deepen your understanding of course topics and how they apply to your career and academic goals. Instructors help students build their civic skills, community networks, and address important needs identified by our community partners, while completing their required course expectations. ACM faculty work with a variety of community partners locally, regionally, nationally, & internationally to accomplish this goal.

ACM identifies and tracks community engagement using the **Personal and Civic Responsibility (PCR) General Educational Learning Outcome rubric** which includes a community project as part of the course curriculum. **Please note - classes may occur in the spring and/or fall semesters.**
