

Petals for the Planet Plant Info

California Poppy (*Eschscholzia californica*)

- State flower of California
- Attracts bees, beetles, and butterflies
- Drought-tolerant
- Not good for transplanting

Growing Information

- Grown annually
- Sow seeds $\frac{1}{4}$ in deep
- Sow seeds 8-10 in apart
- Sprouts (germinates) in 14-21 days
- Water when soil feels dry, don't overwater
- Expose to 6+ hours of full sun a day

Blue Flax (*Linum lewisii*)

- Attracts bees, flies, and butterflies
- Perennial flower
- Can grow in poor, dry soil
- Drought-tolerant
- Can be transplanted easily

Growing Instructions

- Grow during fall
- Sow seeds $\frac{1}{16}$ in deep
- Sow seeds 4-6 in apart

- Sprouts in 20-25 days
- Water them a little in the morning
- Expose to 6-8 hours of full sun a day

Baby Blue Eyes (*Nemophila menziesii*)

- Annual herb
- Drought-tolerant

Growing Instructions

- Grow during late summer or late fall
- Sow seeds 1/16 in deep
- Sow seeds 4 in apart
- Expose to partial sun
- Sprouts in 7-10 days
- Water when top layer of the soil is dry

Arroyo Lupine (*Lupinus succulentus*)

- Perennial
- Seeds and plant are toxic to humans and animals

Growing Instructions

- Grow in early spring
- Sow 1/8 in deep
- Expose to full sun
- Sprouts in 14-21 days
- Provide adequate water

California Bluebells (*Phacelia campanularia*)

- Attracts hummingbirds and other pollinators

Planting Instructions

- Plant in fall
- Sow 1/16 in deep
- Expose to full sun
- Sprouts in 15-21 days
- Don't overwater (needs low water)

White Yarrow (*Achillea millefolium*)

- Perennial wildflower
- Drought-tolerant
- Habitat for good insects and butterflies

Planting Instructions

- Plant from spring to late fall
- Don't cover seeds with soil
- Expose to full sun
- Water lightly
- Sprouts in 14-21 days

Milkweed, Narrow-Leaved (*Asclepias fascicularis*)

- Attracts butterflies
- Monarchs lay eggs on milkweed

Growing Instructions

- Plant during cool season
- Sow $\frac{1}{8}$ in deep
- Expose to full sun or shade
- Water daily or every few days
- Sprouts in 10-20 days
