

## Card №2. Education

What can you tell me about your school?	I live in a city and go to a city school. My school building is of a typical design. It's a three-storied building with flowers in front of it and two sports grounds near it. My school is rather big with spacious classrooms for different subjects, with a teachers' room, two gyms, a library, a canteen, a café, an assembly hall and numerous cloakrooms for pupils. Almost all classrooms are well-equipped, and my teachers do their best to provide all pupils with excellent knowledge. The atmosphere in my school is friendly and, I suppose, I will miss my teachers and my classmates after I leave school.
2. Have you decided what you will do after leaving school?	Of course, I have. I'm going to enter the university. I'd like to connect my life with business matters. I want a profitable job, but I also want to enjoy the profession in which I'll be engaged. I want a creative job to embody my interests. In future I'd like to achieve success and get satisfaction from my career.
3. Ask me 3 questions about the school I went to when I was young.	What marks did you get at school? Did you come to school in time? What was your favourite subject?
Give me a piece of advice on how to make all the pupils more attentive at the lesson.	Interest is a great motivator. Pupils are attentive when they are interested in what they are doing. Here are some tips how to make your lessons interesting enough: <ul style="list-style-type: none"><li>● Learning is the most fun when you don't know what to expect. Make your lesson mysterious.</li><li>● Have a little bit of fun using games.</li><li>● Give students the opportunity to choose what or how they are going to learn.</li><li>● Make lessons interactive by involving students in every aspect of the lesson, this means creating hands-on lessons.</li><li>● Try and create a real-world connection to what students are learning.</li></ul>
5. Some people think that education is a key to success. Do you agree with it?	It has always been important to have a good education. Unfortunately, these days the values have changed and it's not easy even for a person with a good education to find a place in the society. To my mind, all professions need special education. Nowadays only highly qualified workers can deal with rather sophisticated equipment and computers. Sure, there are talented people, but to my mind, all the gifts should be

	developed and supported by education and by more experienced people.
