

Awareness Months for use in classes

All year long we can celebrate the contributions of people from non-dominant cultures to the field of statistics and mathematics.

Class discussion/activity: Students can research a person, share with the class the contribution the person has had in their field, and share what the student found interesting about the figure.

Amstat News is a great resource for celebrating people. Hover over the link to Statisticians in History at amstat.org to see years of articles.

For a general list of people, visit [Statisticians in History](#) from amstat.org.

February
