

10th and 11th grade students who took the School Day PSAT on October 24th, your scores are now available on Big Future. You can quickly view your scores and more with the new BigFuture® School mobile app!

Here's how it works:

- Students who provided their mobile number during digital exam setup will receive a text message when their scores are available. They'll need their phone number to securely access the app, but no password is required.
- In addition to their scores, they'll see a sample list of growing careers in their state that connect to the math, reading, and writing skills they demonstrated on the PSAT/NMSQT or SAT.
- Students can opt in to Connections™ to hear from institutions that may be a good fit.

- Students who can't or don't want to use the app can still get their scores by logging in to their College Board account.
