Question (2): Data Analysis

In the MS Excel file inserted here, answer the following questions. (30 marks)

i. Please highlight any duplicate records and clean the data in the "Database Raw" sheet to be able to do an analysis.
ii. In the "Database Raw" worksheet, insert a column after 'Governorate' and name it 'District'. Put the district names from the worksheet "Code_Districts" using vlookup function.
iii. Use IF formula in the column highlighted in yellow to calculate the HHs food consumption score and categorize the group as mentioned below:
Acceptable (FCS > 42)   Borderline (FCS > 28)   Poor (FCS = 0-28)

iv. In a separate excel sheet, use the appropriate formula or pivot table to calculate the percentage of FCS (food consumption score) for Taiz governorate & insert a graph showing the number of households per categorized in "Acceptable, borderline and poor".
v. Make a pivot table showing the number of participants gave consent per governorate, district and gender.
