

Generative Somatics Groups for Palestine

This is a collection of flyers for upcoming groups hosted by the generative somatics practitioners network to support anti-zionist, pro-palestine organizers, cultural workers, and practitioners. We chose to orient these groups around shared identity to increase chances for dropping in and feeling safe enough to enter in a group of people who won't necessarily know each other beforehand. *People with overlapping identities are invited to participate in any and all of the groups that apply.*
