Privacy Policy for Timezone Spoofer

Data Collection:

This extension does NOT collect, store, transmit, or share any personal data or browsing information.

What We Store Locally:

- Your timezone preference setting (e.g., "America/New_York")
- Extension enabled/disabled state

This data is stored locally in your browser using Chrome's storage API and is never transmitted to any external servers.

Permissions Explanation:

- Host Permissions (<all_urls>): Required to inject timezone spoofing scripts on all websites
- Storage: Used only to save your timezone preference locally

No Analytics or Tracking:

We do not use Google Analytics, tracking pixels, or any other analytics services.

Contact:
