

1

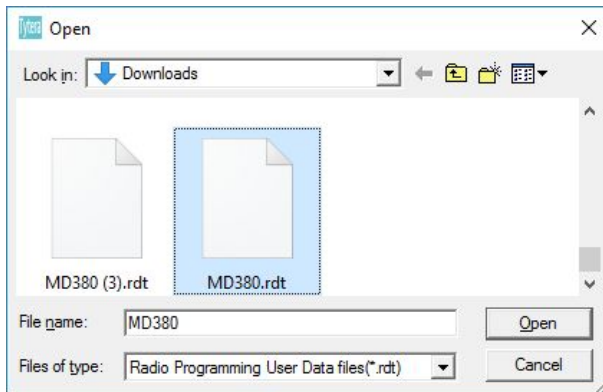

Start MD380 CPS Program by double clicking the program icon (Example of the icon shown. The Icon might be slightly different on your computer)

2

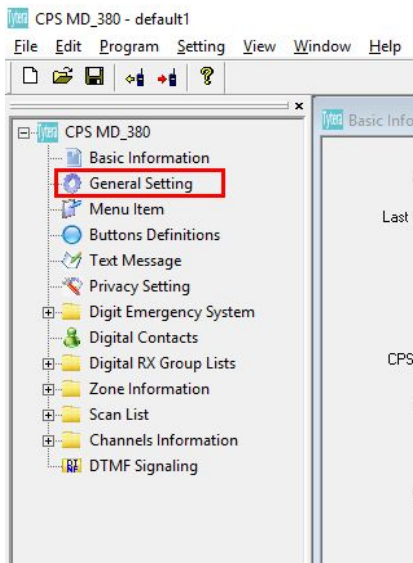

Click File, then Open on the Menu Bar (as shown)

3

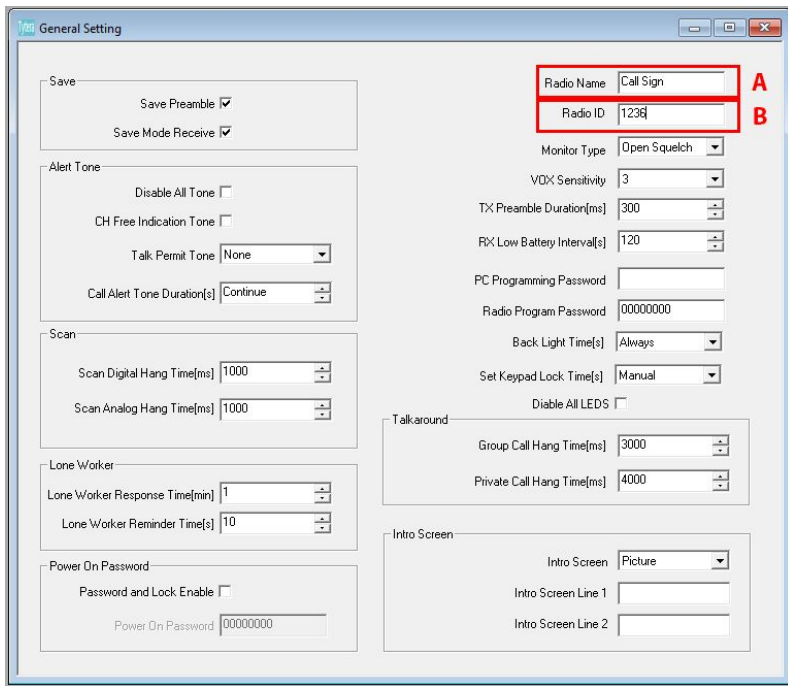

In the Open Dialog box find and select the codeplug file, then click open. The codeplug file will have an extension of “.rdt”.

4

Double Click on the “General Setting” shown

5

Set Your Radio ID and Radio Name.

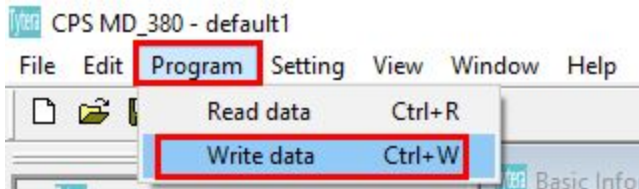

a.) Type in your call sign and or name in text box **A - Radio Name**

b.) Type in your radio ID assigned to you in text box **B - Radio ID**

6

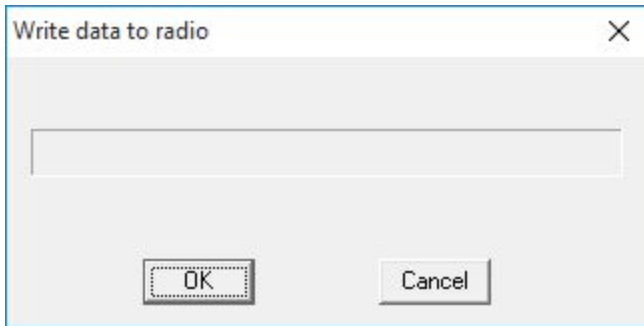

- a.) Plug your cable into the computer
- b.) Plug the other end of the cable into your radio
- c.) Power the radio on

7

Click "Program" on the menu bar and then click "Write Date" as illustrated above.

8

A dialog will appear similar to this one. Click the OK button the write the codeplug to your radio.

9

When you see this box you are done. Your Radio will reboot.

Disconnect your cables and begin using your radio.
