## Warning

The **FARG-DOC** series have officially been **discontinued**. It will not be accessible anymore via the **Discord server pins** in the near future. However, the document **will remain in public access** for everyone who prefers it over the **other document**. The main reason is due to the **lack of ability to continuously maintain the document**, leading to it becoming completely **obsolete**. Also, it will allow everyone to focus just on one document instead of checking both of them. Any queries are to be directed to the user **.....**. Thanks for your attention.

## Introduction

Welcome,

From **05/12/25** to **09/12/25**, **Filian** hosted a **series of Minecraft Hardcore streams** alongside **Vedal** and **Crelly**. Throughout these **broadcasts**, **viewers** began **noticing** a **growing number of anomalies**, including **unexplained visual glitches** and **irregular audio events**.

On the **final stream**, dated **09/12/25**, **Filian** played a **couple of minutes long clip** at the end in which she stated that she would be **going away for a little while**. Since that moment, she has made **no further public appearances or statements**.

**Subsequent discoveries** led to the **identification** of a **secret YouTube channel**, which marked the beginning of what is now believed to be a **coordinated ARG (Alternate Reality Game)**.

This **document** serves as a **general overview** of the **ARG**. It compiles **verified evidence**, **documented anomalies**, and **leading theories** gathered from **across the internet**, with the **goal of organizing all known information** and **supporting the community's ongoing efforts** to **uncover the truth behind Filian's disappearance**. It is **not** authored by, nor affiliated with, **Filian** or any **authorized representatives** of the **ARG** team.

## Structure

The document is composed of a few sections:
