

Turnitin Blackboard Integration - Instructor

Overview

Turnitin is a plagiarism detection software meant to aid students and faculty in their joint efforts to reduce plagiarism and promote originality in student papers. This tutorial will explain how to use the Turnitin Blackboard integration for course assignments.

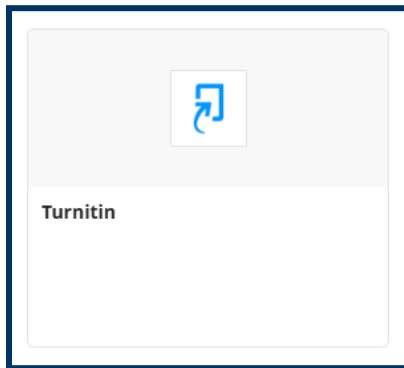

Quick Steps

Create an Assignment > View Submissions

Step 1

Access the [Creating an Assignment tutorial](#) to set up your Turnitin assignment.

Note: The tool in Blackboard is named Turnitin.

Step 2

To view/grade assignment submissions click on the Turnitin assignment in the course content area **or** in the gradebook.

Clicking on the assignment launches the Turnitin [Assignment Inbox](#). The paper id, the date when the paper was uploaded, the grade, the similarity score and other details are displayed. To view and mark up the paper in the Feedback Studio, click on the paper title.

Step 3

Access the [instructor guidance for assignment management](#) for additional instructions.
