

TYPE THE TITLE OF YOUR MANUSCRIPT HERE ALL CAPITALIZED

Type first author's full name^{*1}, second author's full name² and third author's full name³ (and more as applicable)

¹Institution and address of first author

²Institution and address of second author

³Institution and address of third author

*Corresponding author: type the e-mail address@here

Received: (by editor); Accepted: (by editor); Published: (by editor)

ABSTRACT

Except for short communications, all submitted manuscripts should be accompanied by an abstract. The abstract consists of no more than 250 words, written in one paragraph which should clearly state the essence of the paper, with no references cited. Font Times New Roman 11, single space.

Key words: list up to 5 key words, all typed in lowercase except a proper noun, separated by commas, presented in alphabetical order

INTRODUCTION

Please notice that the manuscript must be written in English and should use the American English spelling. The introduction should include background of the topic, should briefly justify the research and state the objectives. References related to the justification of the research should be cited in the introduction but extensive and elaborate discussion of relevant literature should be addressed in the Discussion section. References are to be cited in the text by the author's surname and year of publication. When citing multiple sources, place them in chronological order, for example: (Glaubrecht, 1999, 2006; Glaubrecht et al., 2009; Maaß & Glaubrecht, 2012). For two authors, both names should be cited. For three authors or more, only the first author is given followed by et al.

MATERIALS AND METHODS

Provide a clear explanation of materials and methods used in the research. Details on methods can refer to earlier publications. For examples: The methods used here were described in our previous publication (Yokoi et al., 2016). Depository of materials, if any, should be mentioned here. The materials used here are deposited in the following museums: Please also apply Times New Roman 12 pt, 1.5 space.

Study sites if available should be mentioned here. Interesting sites could be provided as figures or maps.

Reference to terminology used should be made clear and can refer to previous research by citing the reference.

RESULTS

Please provide the results in a clear way, consistent with the aims presented in the Introduction. The results can be presented in the form of tables and figures when appropriate. The text should explain and elaborate the data presented. Captions of tables, figures, and plates should be inserted where you prefer them to be inserted.

Table 1. Type the title of the table here clearly and concisely. Please use Times New Roman 10 pt

Place your table here (or at least indicate the position that you prefer for the table), Times New Roman 10 pt.

Please do not use vertical lines for tables

All line drawings, photographs and other figures may be submitted in JPEG format and the image size should be at least 1024 by 768 pixels.

Place your figure here (or at least indicate the position that you prefer for the figure)

Figure 1. Holotype of *Euploea tulliolus goodenoughi* Carpenter, 1942 showing the upperside. This figure legend is preferably informative as a stand-alone text.

DISCUSSION

The discussion should interpret the results clearly and should discuss the findings in relation with previous publications. Please elaborate as needed.

ACKNOWLEDGMENTS

Acknowledgments of grants, assistance and other matters can be written here in one paragraph.
