

JUSTICE UPON JUSTICE

I was walking all by myself in that dark and dense forest. Suddenly I turned around and saw nothing. But I was having a strong feeling that someone was behind me and trying to contact me. I asked who's there? No one answered. From that time I started panicking but behaved normally because I was unable to find my home. After sometime, again I felt someone's presence then what I saw literally I wasn't prepared for that. A teenage girl like me was talking to someone. Laughing loudly and suddenly she started crying. I went to her so that I could console her, she hugged me so tightly that I got afraid. I asked her that whom she was talking with, she again started laughing loudly! In that moment I was so confused and got blanked. Then she threw a stone on my head and I became senseless. When I woke up, I saw many girls over there talking alone to someone but whom they were talking to I didn't know. When I was watching all of that, within some moments they all started quarreling, I Immediately started running and got so afraid. Someone just came and catched me! I was begging him so that he could leave me. He said if I co-operate with him he would behave nicely but if I don't co-operate, I need to pay a huge price for that. When I went with him those girls were standing in a line and someone was doing some kinds of magic. Through that magic, those guys were taking some girl's eyes, some girl's brain, kidney, heart even hands and legs! But the most horrifying matter was that those girls were so normal. After some time sun was about to rise and those guys started running. That day I stayed there because I was so mentally disabled to think anything. Again night was coming and I was having panic attacks. Suddenly it started raining and those guys weren't able to use their magic's! At that moment, I was so sure that they can't do any magic in presence of water. I maked a plan so that I could run from there with left over girls. But unfortunately my plan became failed and a person who looked like ghost came to me and told me to believe him so that he could tell me about all of this. Then he said, those guys who were doing magics they were killed by those girls parents. They did all of this just to get themselves justice. I told him that killing someone can never be a justice to someone but he said he totally agree with me but other guys whom are actually were ghosts didn't agree with the other ghost whom I was talking to. Thats the reason he got separted from others. At that moment I again started running so that I could find a river full of water. Only with the help of water I could stop them. Fortunately I found a river and a pipe, with those I threw water on them and destroyed their magic system. Finally we came out of that forest and told everything to police though it was hard to believe but still they believed because there were many eye witnesses. That souls got justice now the world see me as a hero but here maybe I can never get through my traumatized mind.
