

[TITLE OF THE POSTER CONTRIBUTION]

Author One¹, Author Two², Author Three¹

¹Affiliation, City, Country | ²Affiliation, City, Country
Corresponding author: email@institution.edu

1. INTRODUCTION

Briefly introduce the problem, its relevance, the research context, and the objective(s) of the work. Clearly state what motivates the contribution and why it is relevant to the WAIMLAp community.

[Replace this text with your content. Keep the background concise and focus on the problem, motivation, and objective.]

2. METHODOLOGY

Describe the data, methods, models, experimental design, implementation, or analytical procedure. Include only the information needed to understand and discuss the work.

[Describe your methodology here. A compact figure, workflow, equation, or table may be included if it improves clarity.]

3. RESULTS AND DISCUSSION

Present the main results, preliminary findings, or evidence available at the time of submission. For work in progress, clearly distinguish completed results from ongoing or planned work and explain why the findings are relevant.

[Summarize the most important results and their interpretation. Avoid simply listing metrics; explain what the results mean.]

4. CONCLUSIONS

State the main conclusion(s), contribution(s), limitations, and—when appropriate—the next steps of the work.

[Provide concise conclusions and the main message you would like participants to discuss with you during the poster session.]

REFERENCES

Include only the most relevant references. Use a consistent citation style (IEEE or APA). References must be included within the two-page limit.

[1] A. Author and B. Author, "Title of the work," Journal/Conference, year.

[2] C. Author et al., "Title of the work," Journal/Conference, year.

SUBMISSION NOTES

- Maximum length: 2 pages, including figures, tables, and references.
- Language: English.
- Final submission format: PDF.
- Required filename: Abstract_TitleOfWork.pdf.
- The extended abstract of accepted contributions may be published on the WAIMLAp 2026 website.
- Do not remove the WAIMLAp/PUCP header.
