

Frequency information for AQA GCSE Spanish vocabulary (full list)

Source of frequency rankings: Davies, M., & Davies, K. (2018). *A frequency dictionary of Spanish: Core vocabulary for learners* (2nd ed.). London: Routledge.

Words are ranked from 1 (most frequently occurring) to 5000 (least frequently occurring).

In many cases, an entry in the AQA list consists of more than one word (e.g. darse cuenta de - to realise). Since the corpus we used (Davies & Davies, 2018) provides frequency data for lemma, rather than for multiword units, it was not possible to obtain accurate frequency rankings that directly corresponded to these entries. However, we were still able to find frequency rankings for constituent words (e.g. 42 [dar] 196 [cuenta]). This is useful in illustrating how individual words often occur within multi-word units in a range of contexts and sometimes express different meanings. For example, 'cuenta', a high frequency word, also appears in the AQA list as a noun meaning 'bill'.

* Indicates that this word appears more than once in the list, e.g., *parte* in 'por una parte', 'formar parte', 'por todas partes'
